Within thirty years of the Great Chicago Fire, the revitalized city was boasting some of America's grandest department stores. The retail corridor on State Street was a crowded canyon of innovation and inventory where you could buy anything from a paper clip to an airplane. Revisit a time when a trip downtown meant dressing up for lunch at Marshall Field's Walnut Room, strolling the aisles of Sears for Craftsman tools or redeeming S&H Green Stamps at Wieboldt's. Whether your family favored The Fair, Carson Pirie Scott, Montgomery Ward or Goldblatt's, you were guaranteed stunning architectural design, attentive customer service and eye-popping holiday window displays. Lavishly illustrated with photographs, advertisements, catalogue images and postcards, Leslie Goddard's narrative brings to life the Windy City's fabulous retail past.

Community policing is a philosophy and organizational strategy that expands the traditional police mandate of fighting crime to include forming partnerships with citizenry that endorse mutual support and participation. The first textbook of its kind, Community Policing: A Contemporary Perspective delineates this progressive approach,

combining the accrued wisdom and experience of its established authors with the latest research-based insights to help students apply what is on the page to the world beyond. This seventh edition extends the road map presented by Robert Trojanowicz, the father of community policing, and brings it into contemporary focus. The text has been revised throughout to include the most current developments in the field, including "Spotlight on Community Policing Practice" features that focus on real-life community policing programs in various cities as well as problem-

solving case studies. Also assisting the reader in understanding the material are Learning Objectives, Key Terms, and Discussion Questions, in addition to numerous links to resources outside the text. A glossary and an appendix, "The Ten Principles of Community Policing," further enhance learning of the material.
