Review the diagrams below before answering the pre-lab questions. Pre-Lab Questions 1. What type of organs are the humerus, radius, and ulna? Bones 2.

Chicken Wing Dissection Lab Flashcards | Quizlet

Although the chicken wing and the human arm are both limbs, they are not completely the same. The chicken wing and the arm both have skin on the outside with fat and muscle underneath. There are a different number of muscles and tendons in the wing compared to the arm because there are different bones to

move.
