This text examines the negative practices of schools which are resulting in school systems failing students. Such practices include intrusive authoritarian administrative structures and procedures; inappropriate discipline; unrealistic expectations; and placid acceptance of exclusionary practices. Indeed, educational systemic violence includes any practice or procedure that prevents students from learning, thus harming them. Taking a close look at ways in which current social problems may be a result of, or even supported by, compulsory schooling, the contributors to this volume consider whether or not schools contribute to the violence amongst modern young people.

Methods for the Ethnography of Communication is a guide to conducting ethnographic research in classroom and community settings that introduces students to the field of ethnography of communication, and takes them through the recursive and nonlinear cycle of ethnographic research. Drawing on the mnemonic that Hymes used to develop the Ethnography of SPEAKING, the authors introduce the innovative CULTURES framework to provide a helpful structure for moving through the complex process of collecting and analyzing ethnographic data and addresses the larger "how-to" questions that students struggle with when undertaking ethnographic research. Exercises and activities help students make the connection between communicative events, acts, and situations and ways of studying them ethnographically. Integrating a primary focus on language in use within an ethnographic framework makes this book an invaluable core text for courses on ethnography of communication and related areas in a variety of disciplines.
