From the shores of Anzac Cove to the heights of Chunuk Bair, from Cape Helles to Gurkha Bluff, the Gallipoli Peninsula was the place where thousands of men from sixteen nations fought, suffered, endured or died during the eight months of occupation in 1915. For each of them, their families and their nurses, Gallipoli meant something different. Their voices emerge from the landscape and across the decades with stories of courage, valour, despair and loss.

Tower in the Sky Handbook of Natural Language Processing and Machine Translation

Winner of the Queensland Literary Award. Shortlisted for the Miles Franklin Award and the Barbara Jefferis Prize. It is 1950, the League of Nations has collapsed and the newly formed United Nations has rejected all those who worked and fought for the League. Edith Campbell Berry, who joined the League in Geneva before the war, is out of a job, her vision shattered. With her sexually unconventional husband, Ambrose, she comes back to Australia to live in Canberra. Edith now has ambitions to become Australia's first female ambassador, but while she waits for a Call from On High, she finds herself caught up in the planning of the national capital and the dream that it should be 'a city like no other'. When her communist brother, Frederick, turns up out of the blue after many years of absence, she becomes concerned that he may jeopardise her chances of becoming a diplomat. It is not a safe time to be a communist in Australia or to be related to one, but she refuses to be cowed by the anti-communist sentiment sweeping the country. It is also not a safe time or place to be 'a wife with a lavender husband'. After pursuing the Bloomsbury life for many years, Edith finds herself fearful of being exposed. Unexpectedly, in mid-life she also realises that she yearns for children. When she meets a man who could offer not only security but a ready-made family, she consults the Book of Crossroads and the answer changes the course of her life. Intelligent, poignant and absorbing, *Cold Light* is a remarkable stand-alone novel, which can also be read as a companion to the earlier Edith novels *Grand Days* and *Dark Palace*.

A stalwart orphan sets out on a spine-tingling adventure in this wildly imaginative and darkly funny Victorian middle grade novel. High on a cliff above the gloomy Victorian town of Withering-by-Sea stands the Hotel Majestic. Inside the walls of the damp, dull hotel, eleven-year-old orphan Stella Montgomery leads a miserable life with her three dreadful aunts. Stella dreams of adventuring on the Amazon—or anyplace, really, as long as it isn't

this dreary town where nothing ever happens. Then one night Stella sees something she shouldn't have. Soon she finds herself on the run from terrifying Professor Stark and his gang of thugs. But how can one young girl outwit an evil magician, much less rescue his poor, mistreated assistant? With the help of a mysterious maestro, his musical cats, and a lively girl named Gert, Stella Montgomery sets out to do the impossible.

The new edition of *Gene Control* has been updated to include significant advances in the roles of the epigenome and regulatory RNAs in gene regulation. The chapter structure remains the same: the first part consists of pairs of chapters that explain the mechanisms involved and how they regulate gene expression, and the second part deals with specific biological processes (including diseases) and how they are controlled by genes. Coverage of methodology has been strengthened by the inclusion more explanation and diagrams. The significant revision and updating will allow *Gene Control* to continue to be of value to students, scientists and clinicians interested in the topic of gene control.

Study Guide for Campbell Biology, Canadian Edition Wiley Global Education

This comprehensive handbook, written by leading experts in the field, details the groundbreaking research conducted under the breakthrough GALE program--The Global Autonomous Language Exploitation within the Defense Advanced Research Projects Agency (DARPA), while placing it in the context of previous research in the fields of natural language and signal processing, artificial intelligence and machine translation. The most fundamental contrast between GALE and its predecessor programs was its holistic integration of previously separate or sequential processes. In earlier language research programs, each of the individual processes was performed separately and sequentially: speech recognition, language recognition, transcription, translation, and content summarization. The GALE program employed a distinctly new approach by executing these processes simultaneously. Speech and language recognition algorithms now aid translation and transcription processes and vice versa. This combination of previously distinct processes has produced significant research and performance breakthroughs and has fundamentally changed the natural language processing and machine translation fields. This comprehensive handbook provides an exhaustive exploration into these latest technologies in natural language, speech and signal processing, and machine translation, providing researchers, practitioners and students with an authoritative reference on the topic.
