An ideal companion text to Foundations of Nursing, this clearly-written, colorful, and attractively-designed resource prepares the LPN/LVN for today's medical-surgical nursing practice. Content focuses on the nursing process and nursing actions, addressing contemporary issues that include care of the older adult, cultural considerations, delegation to unlicensed assistive personnel, patient/family teaching, and home/long-term care. Used together, these two texts provide all the content covered in the entire LPN/LVN curriculum. The nursing process is applied consistently and logically to the discussion of disorders and appears in complete summary form at the end of every chapter. Full-color art, photography, and design add visual appeal to text content. An Overview of Anatomy and Physiology opens all body systems chapters. Objectives are divided into Anatomy & Physiology and Medical-Surgical categories. Nursing Care Plans are developed around specific case studies with an emphasis on patient goals, outcomes, and questions to promote critical thinking. Clinical Pathways reflect collaborative care. Assessment is separated out into Subjective and Objective Data. Nursing Diagnoses paired with disorder-appropriate Nursing Interventions are screened and highlighted in the text. Critical Thinking Questions are found at the end of every Nursing Care Plan. Therapeutic Dialogue boxes focus on communication through real-life examples of nurse-patient dialogue. Patient Teaching boxes examine discharge instructions and health promotion for patients and families. Home Health Considerations boxes discuss issues facing patients and caregivers in the home care setting. Older Adult Considerations boxes bring a gerontologic perspective to the analysis of specific disorders. Cultural and Ethnic Considerations boxes teach students about specific cultural preferences and how to address the needs of cultural diversity when planning nursing care. Medications tables provide quick access to action, dosage, precautions, and nursing considerations for

commonly used drugs. Key Terms appear with phonetic pronunciations at the beginning of the chapter, are in color at first mention, and are defined in the Glossary. Pronunciations have been reviewed by an English as a Second Language (ESL) consultant TOC reorganized based on reviewers' suggestions to improve accessibility of content Complementary and Alternative Therapy boxes in nearly every chapter give a breakdown of specific therapies, along with precautions and possible side effects End-of-chapter pedagogy is reorganized, with Key Points and Chapter Challenge (Study Questions) immediately following the end of the narrative Chapter Challenge ends the chapter with NCLEX-style multiple-choice Study Questions References and Suggested Readings are revised and updated and, where applicable, are followed by Additional Resources such as agencies and websites. One of the most complete nursing education learning systems available, *Virtual Clinical Excursions* is an online program that guides you through a virtual hospital where the patients are real and their conditions are constantly changing. By immersing students in a realistic, yet safe, nursing environment, VCE simulates the average clinical rotation by allowing users to conduct a complete assessment of a patient and set priorities for care, collect information, analyze and interpret data, prepare and administer medications, and reach conclusions about complex problems. Each lesson has a textbook reading assignment and activities based on "visiting" the patients in the hospital - providing a perfect environment to "practice" what you are learning. Online workbook includes a set of lessons to prepare and guide you through a variety of patient scenarios, which are all connected to your textbook. Physical examination interactions include unique images and assessment findings for each patient scenario. Patient chart provides quick access to vital information such as physician's orders, laboratory reports, patient education, nursing admission, and more, offering a richly detailed portrait of the patient. Electronic patient record houses data from the patient's entire hospital stay and offers the ability to record new data findings. Nurse-client interaction videos depict conversations and situations involving nurses, patients, family members, and hospital staff to help you discern between communications that are ideal and those that need improvement. Updated drug reference includes a comprehensive set of the latest drug monographs to help you make the best clinical judgments involving medication administration. NEW! Online format enables you to access *Virtual Clinical Excursions* from any PC or MAC with an internet connection. NEW! Laboratory guide provides standard value ranges for all laboratory values offered within the virtual patient hospital, so you can confirm and compare standard lab values against your patients' test results.
