Needless Deaths in the Gulf War CreateSpace Lethal and Non-Lethal Fires: Historical Case Studies of Converging Cross-Domain Fires in Large Scale Combat Operations, provides a collection of ten historical case studies from World War I through Desert Storm. The case studies detail the use of lethal and non-lethal fires conducted

by US, British, Canadian, and Israeli forces against peer or near-peer threats. The case studies span the major wars of the twentieth-century and present the doctrine the various organizations used, together with the challenges the leaders encountered with the doctrine and the operational environment, as well as the leaders' actions and decisions during the conduct of operations. Most importantly, each chapter highlights the lessons learned from those large scale combat operations, how they were applied or

ignored and how they remain relevant today and in the future. The Forgotten Queens of Islam Createspace Independent Publishing Platform Volume 5, Deep Maneuver: Historical Case Studies of Maneuver in Large-Scale Combat Operations, presents eleven case studies from World War II through Operation Iraqi Freedom focusing on deep maneuver in terms of time, space and purpose. Deep operations require boldness and audacity, and yet carry an element of risk of overextension - especially in light of the independent factors of geography and weather that are ever-present. As a result, the case studies address not only successes, but also failure and shortfalls that result when conducting deep operations. The final two chapters address these considerations for future Deep Maneuver.

While the battle for air supremacy is being waged in the skies, the coalition forces pull off a stunning, and ultimately decisive, deception. Later dubbed the “ Hail Mary Pass, ” it consists of the abrupt relocation of the coalition ground forces hundreds of miles to the West. Meanwhile, as inflatable decoys, deceptive radio transmissions, and psyops leaflets all lead them to believe, the Iraqis are expecting an amphibious assault from the Persian Gulf, hundreds of miles from where it is actually occurring. The world ’ s fourth largest army is preparing to engage a horde of phantoms. The coalition forces are able to march deep into Iraq with little opposition. Within one hundred days, Kuwait City is liberated and a decisive victory by the coalition forces is won. Deception on the battlefield is surely as old as warfare itself. The examples stretch from the very beginnings of recorded military history—Pharaoh Ramses II's campaign against the Hittites in 1294 B.C.—to modern times, when technology has placed a stunning array of devices into the arsenals of military commanders. Military historians often underestimate the importance of deception in warfare. This book is the first to fully describe its value. Jon Latimer shows how simple

some tricks have been, but also how technology has increased the range and subtlety of what is possible—bogus radio traffic, virtual images, even false smells. He draws examples from land, sea, and air to show how great commanders have always had, as Winston Churchill put it, that indispensable “ element of legerdemain, an original and sinister touch, which leaves the enemy puzzled as well as beaten. ”

[This book] meshes a discussion of development issues and processes with four different systems of religious beliefs: Hinduism, Christianity, Islam, and the Baha'i Faith. The authors - each a scientist as well as a person of faith - show how religious belief and personal faith can be deeply motivational and strikingly fruitful in scientific pursuits. Further, they emphasize how their faith has brought them a profound understanding of

interconnectedness and compassion, and thus a wider perspective and greater sense of personal meaning to their research.

The 1,400-year-old schism between Sunnis and Shi'is is currently reflected in the destructive struggle for hegemony between Saudi Arabia and Iran—with no apparent end in sight. But how did this conflict begin, and why is it now the focus of so much attention? Charting the history of Islam from the death of the Prophet Muhammad to the present day, John McHugo describes the conflicts that raged over the succession to the Prophet, how Sunnism and Shi'ism evolved as different sects during the Abbasid caliphate, and how the rivalry between the Sunni Ottomans and Shi'i Safavids ensured that the split would continue into the modern age. In recent decades, this centuries-old divide has acquired a new toxicity that has resulted in violence across the Arab

world and other Muslim countries. Definitive, insightful, and accessible, *A Concise History of Sunnis and Shi'is* is an essential guide to understanding the genesis, development, and manipulation of the schism that for far too many people has come to define Islam and the Muslim world.

From the bestselling author of *The Day of the Jackal*, international master of intrigue Frederick Forsyth, comes a thriller that brilliantly blends fact with fiction for one of this summer's—or any season's—most explosive reads! From the behind-the-scenes decision-making of the Allies to the secret meetings of Saddam Hussein's war cabinet, from the brave American fliers running their dangerous missions over Iraq to the heroic young spy planted deep in the heart of Baghdad, Forsyth's incomparable storytelling skill keeps the suspense at a breakneck pace. Somewhere in Baghdad is the mysterious "Jericho," the traitor who is willing—for a price—to reveal what is going on in the high councils of the Iraqi dictator. But Saddam's ultimate weapon has been kept secret even from his most trusted advisers, and the nightmare scenario that haunts General Schwarzkopf and his colleagues is suddenly imminent, unless somehow, the spy can locate that

weapon—The Fist of God—in time. Peopled with vivid characters, brilliantly displaying Forsyth's incomparable, knowledge of intelligence operations and tradecraft, moving back and forth between Washington and London, Baghdad and Kuwait, desert vastnesses and city bazaars, this breathtaking novel is an utterly convincing story of what may actually have happened behind the headlines.

While Muslims in Indonesia have begun to turn towards a strict adherence to Islam, the reality of the socio-religious environment is much more complicated than a simple shift towards fundamentalism. In this volume, contributors explore the multifaceted role of Islam in Indonesia from a variety of different perspectives, drawing on carefully compiled case studies. Topics covered include religious education, the increasing number of Muslim feminists in Indonesia, the role of Indonesia in the greater Muslim world, social activism and the middle class, and the interaction between Muslim radio and religious identity.

We hear about inadequate mental health care. We ask questions regarding a link between mental illness and violence. We do NOT hear as much about the stigma of mental illness that complicates one's ability to cope with a diagnosis that becomes a label, resulting in "self-stigma," discouraging individuals from seeking and/or complying with

treatment. Too often community members only "experience" mental illness through dramatic or dire media stories that fail to inform us about the real world of mental illness. Thus, stigma feeds, and is fed by, myths and misunderstandings leading to a community sense of hopelessness and fear of mental illness. In contrast, Geel, a stigma-free community in Belgium, has a centuries' old history of accepting those with mental illness - even as boarders in their own homes. Geel acknowledges the human needs of those with mental illness and responds to those needs by providing social opportunities and meaningful work, within the community While the U.S. does not have the same history as Geel, we do have programs that offer a fostering environment, offering hope for those with a diagnosis of mental illness as well as for the communities in which they live. In a language and style that can be understood by anyone and everyone, the author shares what she's learned and experienced regarding tolerance and inclusion - in Geel and in our own country - offering individuals and communities an opportunity to hear the encouraging "voices of hope

for mental illness." When the general population is freed of myths and misunderstandings regarding mental illness, we can focus on mental health fostered by community care that thrives in "caring communities."

In My Voice Is My Weapon, David A. McDonald rethinks the conventional history of the Palestinian crisis through an ethnographic analysis of music and musicians, protest songs, and popular culture. Charting a historical narrative that stretches from the late-Ottoman period through the end of the second Palestinian intifada, McDonald examines the shifting politics of music in its capacity to both reflect and shape fundamental aspects of national identity. Drawing case studies from Palestinian communities in Israel, in exile, and under occupation, McDonald grapples with the theoretical and methodological challenges of tracing "resistance" in the popular imagination, attempting to reveal the nuanced ways in which Palestinians have confronted and opposed the traumas of foreign occupation. The first of its kind, this book offers an in-depth ethnomusicological

analysis of the Israeli-Palestinian conflict, contributing a performative perspective to the larger scholarly conversation about one of the world's most contested humanitarian issues.

A timely ethnography of how Indonesia's coastal dwellers inhabit the "chronic present" of a slow-motion natural disaster. Ice caps are melting, seas are rising, and densely populated cities worldwide are threatened by floodwaters, especially in Southeast Asia. *Building on Borrowed Time* is a timely and powerful ethnography of how

people in Semarang, Indonesia, on the north coast of Java, are dealing with this global warming-driven existential challenge. In addition to antiflooding infrastructure breaking down, vast areas of cities like Semarang and Jakarta are rapidly sinking, affecting the very foundations of urban life: toxic water oozes through the floors of houses, bridges are submerged, traffic is interrupted. As Lukas Ley shows, the residents of Semarang are constantly engaged in maintaining their homes and streets, trying to live through a slow-motion disaster shaped by the interacting temporalities of infrastructural failure, ecological deterioration, and urban development. He casts this predicament through the temporal lens of a "meantime," a managerial response that means a constant enduring of the present rather than progress toward a better future—a "chronic present." *Building on Borrowed Time* takes us to a place where a flood crisis has already arrived—where everyday residents are not waiting for the effects of

climate change but are in fact already living with it—and shows that life in coastal Southeast Asia is defined not by the temporality of climate science but by the lived experience of tidal flooding.

Southeast Asia continues to beckon policymakers and scholars alike to revisit its history in spite of the tomes of appraisals already written, deconstructive or otherwise. Because of a significant presence of Muslims in the region, and particularly in the wake of 9/11, it invariably attracts the attention of foreign powers drawn by the specter of terrorism and focused on rooting out radical Islamist groups said to be working with al-Qaeda. Dr. Max Gross has written an impressive account of the role of Islam in the politics of Southeast Asia, anchored by a strong historical perspective and a comprehensive treatment of

current affairs. The result is very much a post-9/11 book. The origins of Jemaah Islamiyah and its connections with al-Qaeda are carefully detailed. Yet, unlike much of the post-9/11 analysis of the Muslim world, Dr. Gross's research has been successful in placing the phenomenon of terrorism within a larger perspective. While recognizing that al-Qaeda's influence on regional terror networks remains unclear, it behooves us to be reminded that, regardless of the nature and extent of the linkages, to dismiss terrorism as a serious threat to security would be naive to the point of recklessness. The Muslim Archipelago is a profoundly Islamic region, and Jemaah Islamiyah is only a small portion of this reality. The attention Dr. Gross pays to ABIM in Malaysia, of which I was a part, and the civil Islam movement in Indonesia, of which the late Nurcholish Madjid was a principal spokesman, is greatly appreciated. Those unfamiliar with the background and role of the traditional Islamic PAS party in Malaysia, as well as the Darul Islam movement in Indonesia, will find the author's account highly beneficial. The MRLF, the MILF, and Abu Sayyaf in the Philippines, as well as the

various Islamic movements in southern Thailand, are also carefully explained. *Science Fiction Prototyping* Potomac Books, Inc.
