Drawing on an extensive study of the primary sources, Damian Smith explores the relationship between the Roman Curia and Aragon-Catalonia in the late 12th and early 13th centuries. His focus is the pontificate of Innocent III, the most politically influential medieval Pope, and the reign of King Peter II of Aragon and the first years of King James I. By analysing the practical example of papal actions towards one of its closest secular allies, the work deepens our understanding of the objectives and limits of the Papacy, while making clear the Pope's profound influence on the realm's political development. Marriage affairs and politics, the Spanish Reconquista, with the campaign of Las Navas, and the Albigensian Crusade, in which King Peter met his death at the battle of Muret, are all covered. The final chapters turn more specifically to Church affairs, looking at the relations between the papacy and the bishops of the province of Tarragona, and at the success of Innocent III's mission to reform religious life.

The essays in this book relate to two major aspects of the nature and effects of the reforms that radically changed the Western church during the eleventh and twelfth centuries. The first is the emergence of the Crusades in so far as they developed under papal direction. Special attention is paid to the transformation in Western attitudes to warfare which occurred at this time. Secondly, the author discusses developments in the monastic order, looking in particular at Cluniac, Carthusian and Cistercian monasticism and the political, social and legal aspects of this process.

The Fifth Crusade represented a cardinal event in early thirteenth-century history, occurring during what was probably the most intensive period of crusading in both Europe and the Holy Land. Following the controversial outcome of the Fourth Crusade in 1204, and the decrees of the Fourth Lateran Council in 1215, Pope Innocent III's reform agenda was set to give momentum to a new crusading effort. Despite the untimely death of Innocent III in 1216, the elaborate organisation and firm crusading framework made it possible for Pope Honorius III to launch and oversee the expedition. The Fifth Crusade marked the last time that a medieval pope would succeed in mounting a full-scale, genuinely international crusade for the recovery of the Holy Land, yet, despite its significance, it has largely been neglected in the historiography. The crusade was much more than just a military campaign, and the present book locates it in the contemporary context for the first time. The Fifth Crusade in Context is of crucial importance not only to better understand the organization and execution of the expedition itself, but also to appreciate its place in the longer history of crusading, as well as the significance of its impact on the medieval world.

D. 1304 University of Pennsylvania Press From the pontificate of Leo IX (1049-1054) to that of Urban II (1088-1099) the movement for ecclesiastical reform which had spread from small monastic centers in Italy, Burgundy, and Lorraine came to be directed by the popes themselves and thus began to focus upon the whole of the universal Church and Christendom. The result of the new universality of the ecclesiastical reform movement was the transformation of Christendom. Its most striking and complex by-product was the First Crusade. - Introduction.

The Crusades and Latin Monasticism, 11th-12th Centuries Bloomsbury Publishing
Archbishop Angelo Roncali (later Pope John XXIII) read True and False Reform during his years as papal nuncio in France and asked, A reform of the church 'is such a thing really possible?' A decade later as pope, he opened the Second Vatican Council by describing its goals in terms that reflected Congar's description of authentic reform: reform that penetrates to the heart of doctrine

as a message of salvation for the whole of humanity, that retrieves the meaning of prophecy in a living church, and that is deeply rooted in history rather than superficially related to the apostolic tradition. Pope John called the council not to reform heresy or to denounce errors but to update the church's capacity to explain itself to the world and to revitalize ecclesial life in al its unique local manifestations. Congar's masterpiece fills in the blanks of what we have been missing in our reception of the council and its call to "true reform." Yves Congar, OP, a French Dominican who died in 1995, was the most important ecclesiologist in modern times. His writings and his active participation in Vatican II had an immense influence upon the council documents. With a few other contemporaries, Congar pioneered a new style of theological research and writing that linked the great tradition of Scripture and the Fathers to contemporary pastoral questions with lucidity and passion. His key concerns were the unity of the church, lay apostolic life, and a revival of the church's theology of the Holy Spirit. He was named a cardinal by Pope John Paul II in recognition of his profound contributions to the Second Vatican Council. Pal Philibert, OP, has taught pastoral theology in the United States and abroad. He is a Dominican friar of the Southern Province. His translation of a collection of Congar's essays on the liturgy has recently been published by Liturgical Press under the title At the Heart of Christian Worship. His book The Priesthood of the Faithful: Key to a living Church (Liturgical Press, 2005) reflects the ecclesiology of Yves Congar and his Vision of the apostolic life of the faithful. Few periods of history are more maligned or misunderstood than the Middle Ages--an exciting period of enduring cultural achievement, division, and reform. In this engaging and easy-to-understand narrative, Catholic historian and crusades scholar Steve Weidenkopf explores the shifting centers of power, reform movements, and tensions both within the Church and between the Church and government. As he examines the challenges the Church faced in the eleventh through fourteenth centuries, Weidenkopf also reintroduces some of our greatest saints--including Francis, Dominic, Anselm, Thomas Aquinas, and Catherine of Siena--and separates fact from fiction about the era. The Church and the Middle Ages is part of the Reclaiming Catholic History series.

"Mr. Medley has done an admirable piece of work in covering so significant a period in a manner both comprehensive and rapid. As its title indicates, it is confined to the period beginning in 1003, when the Church contended with the German empire for temporal power.... It includes within its compass the Crusades and the growth and prominence of several church orders; the Guelf and Ghibelline struggles in Italy and the power and influence of the schoolmen....His style is lucid, his subject-divisions excellent and his grouping of events logical....Perhaps the best church history of that period to be found anywhere." -The Christian Advocate "It is indeed a fortunate thing when men of Mr. Medley's ability and training turn their attention to the history of the church, for they bring to the treatment of the subject a point of view richer and more suggestive than that of the professed historian of the church whose training so often is primarily theological rather than historical. The little book shows al the lucidity and grasp that we would expect from the author of the Constitutional History. In this brief but most helpful account of the development and activities of the church during this period one may signalize not only the interpretations of the incident at Canossa (referred to by the author himself) but also the chapter dealing with 'The Schoolmen and Theology' as showing especially the freshness and suggestiveness so characteristic of the whole book." -The American Journal of Theology CONTENTS INTRODUCTORY CHAPTER I THE BEGINNINGS OF CHURCH REFORM CHAPTER II GREGORY VII AND LAY INVESTITURE CHAPTER III THE END OF THE QUARREL CHAPTER IV THE SECULAR CLERGY CHAPTER V CANONS AND MONKS CHAPTER VI ST. The study of war in all periods of prehistory and recorded history has always commanded the attention of historians, dramatists, poets and artists. The study of peace has, however, not yet gained a comparable readership, and the subject is attracting an increasing amount of scholarly research. This volume presents the first work of academic research to tackle this imbalance head on. It looks at war and peace through the ages, from the Classical world through to the 18th century. It considers the nature and advocacy of war and peace both from an historical perspective but also a philosophical one, particularly looking at how universal peace, which began as a personal philosophy, became over the centuries a political philosophy that underpins much of modern society's attitudes towards warfare and militarism. Roger Manning begins his journey through history by looking at the Greek martial ethos and philosophical concepts of peace and war in the ancient world; moving through the Roman empire's military advances, he explores the concepts of war and peace in the medieval world and the Renaissance, with the writing of Machiavelli and Erasmus; finally, his account of the search for a science of peace in the 17th and 18th centuries brings the book to its conclusion.

Innocent III and the Crown of Aragon Variorum Publishing
The Fourth Lateran Council of 1215 is often considered as the high water-mark for the Medieval Church with its decisions affecting the cultural, social, religious and intellectual history of the Later Medieval World. The council was also a major event in the history of the crusades not only because the reform of the church and the recovery of the Holy Land were the central concerns of Pope Innocent III (1198-1216) but also because at the time of the council political decisions were made which affected all theatres of crusading and the canons of the council dealt with issues concerning piety and economics which had very long-term implications for the crusading movement. This book, bringing together an international team of scholars, is the first to deal with Fourth Lateran and the crusades in entirety and argues for the centrality of the

council in the history of the crusades. It will be of interest not only to scholars of the history of the crusades but also to those interested in the history of the religious life of the Middle Ages as well to students of the particular areas and themes under discussion.

The Papal Monarchy Taylor & Francis
Written by Jacques de Vitry, an individual with a strong interest and participation in new forms of religious life, the reform of the church and the promotion of multiple crusades (the Albigensian, Fifth and crusade of Frederick II), the History of the East represents the visualization of the history of the crusades and the Latin East and a proposal for the latter's recovery and renewal. Begun during the campaign of the Fifth Crusade in Egypt or shortly thereafter, it represents the first leaf of an historical triptych meant to deal with the history and renewal of the Latin Kingdom of Jerusalem (the Historia Orientalis), the reform of the West (the Historia Occidentalis), and the campaign of the Fifth Crusade. The Historia Orientalis (and a third book cobbled together from Jacques's letters, several anonymous histories, and the Historia Damiatina of his colleague Oliver of Paderborn) proved far more popular than the History of the West in the Middle Ages and Renaissance periods-over one hundred manuscripts of the History of the East survive with wide geographical and temporal dispersal and it was translated into both Old French and Spanish. This medieval bestseller and the many ways in which it was used by its readers reflect the osmotic nature of medieval history, which proved capable of absorbing multiple genres. The History of the East represents a blend of crusade chronicle and world history, a geographical treatment of the Holy Land, a moral treatise, a treatment of the peoples of the East from the perspective of a crusader bishop and noted reformer, an account of the wonders and marvels of the East including minerals, flora and fauna. As such, it was copied and utilized by armchair pilgrims, writers of crusade proposals from the thirteenth century onwards, crusade preachers, missionaries and compilers of universal histories. European Jewry and the First Crusade Twenty-Third Publications
This collection of essays by eight leading scholars is a landmark event in the study of crusading in the late middle ages. It is the outcome of an international network funded by the Leverhulme Trust whose members examined the persistence of crusading activity in the fifteenth century from three viewpoints, goals, agencies and resonances. The crusading fronts considered include the conflict with the Ottoman Turks in the Mediterranean and western Balkans, the Teutonic Order's activities in the Baltic region, and the Hussite crusades. The authors review criticism of crusading propaganda on behalf of the crusade, the influence on crusading of demands for Church reform, the impact of printing, expanding knowledge of the world beyond the Christian lands, and new sensibilities about the sufferings of non-combatants.

"The more I listen to people, the more I lecture, the more I realize how wide is the gap between the people's understanding of the Church and the Church's historical realities." [Introduction] The author seeks to close this gap by critically exploring such areas as: the rich variety of ministries in the early Church; the Crusades; the piety of the Middle Ages; the challenge of the Reformation; the role of the pope; the rise, fall and recent reinstatement of the diaconate; the changing role of women in the Church; and the origins of various liturgies and popular devotions.

Historical Dictionary of the Crusades Cambridge University Press
This book provides a needed overview of the scholarship on medieval public culture and popular movements such as the Peace of God, heresy, and the crusades and illustrates how a changing sense of the populus, the importance of publics and public opinion and public spheres was influential in the evolution of medieval cultures. Public opinion did play an important role, even in the Middle Ages; it did not wait until the era of modern history to do so. Using modern research on such aspects of culture as textual communities, large and small publics, cults, crowds, rumor, malediction, gossip, dispute resolution and the European popular revolution, the author focuses on the Peace of God movement, the era of Church reform in the tenth and eleventh centuries, the rise and combat of heresy, the crusades, and the works of fourteenth-century political thinkers such as Marsiglio of Padua regarding the role of the populus as the basis for the analysis. The pattern of changes reflected in this study argues that just as in the modern world the simplistic idea of "the public" was a phantom. Instead there were publics large and small that were influential in shaping the cultures of the era under review.
