Cibse Application Manual Am10 Natural Ventilation

in non-domestic buildings

Dears, I'm developing a small project LEED v4. We don't want to use HVAC system, just natural ventilation. But I am with big difficulties to understand how I can provide a documentation demonstrating that natural ventilation is an effective strategy, following the flow chart of CIBSE AM10 (figure 2.8).

Natural ventilation in non-domestic buildings : CIBSE ... AM10: Natural ventilation in non-domestic buildings (2005) This publication is a major revision of the Applications Manual (AM) first published in 1997. At that time, there was a significant expansion of interest in the application of engineered natural ventilation to the design of non-domestic buildings. The original AM10 sought to capture the state of knowledge as it existed in the mid-90s and present it in a form suited to the needs of every member of the design team.

Cibse Application Manual Am 13 - partsstop.com

The first edition of AM10 devoted its first section to setting natural ventilation into the context of the range of available design solutions. This aspect is now dealt with in CIBSE Guide B2: Ventilation and air conditioning(2). The Guide sets out the various approaches to ventilation and cooling of buildings, summarises the relative advantages
