business qualification with a finance focus, aiming to produce members with accounting prowess who are skilled in strategic decision-making. 98% of its members work in business, the highest proportion of any worldwide accountancy body. The CIMA E1 exam covers a variety of topics that are unrelated but are all essential to the running of a successful business. There is a strong theoretical basis to this subject and it is important that students understand how to apply these theories

in the 'real world'. The key E1 subject areas are: \* The global business environment \* Information systems \* Marketing \* Managing human capital. The E1 Study Text comprehensively covers all the E1 syllabus areas. It breaks down each topic into manageable chunks and clearly describes all relevant theories. The questions in the question bank demonstrate how these theories should be applied in an exam situation. CIMA Chartered

Management Accountant Exam  
Exam FOCUS Study Notes 2011 BPP Learning Media  
Keep in mind, the CIMA exam is NOT an accountant exam. It is more of a business management nature. Pure accounting knowledge would not be sufficient. CIMA places emphasis on strategic business skills. A CIMA qualification can widen one's career options, in and outside of finance. In fact, CIMA claims itself as the only accounting body that focuses primarily on business needs. As a Chartered Management Accountant, one is at the forefront of business planning, strategy and change across the sectors - industry, commerce,

and the public sector and not-for-profit organizations. It is generally believed that the CIMA certification is more "international" while the CMA certification (the one from IMA) is more US oriented. According to the CIMA, a Chartered management accountant is qualified to engage in a wide variety of activities, such as: -advising managers about the financial implications of project management -explaining the financial consequences of management decisions and suggesting actions -making strategic decisions and formulating business strategies to create wealth and shareholder value -monitoring spending and financial control -managing risk and business assurance

-cost determination and financial control  
 -evaluating existing financial information systems and suggesting improvements  
 -conducting internal business audits and preparing periodic financial statements for managers  
 -explaining the impact of the competitive landscape.  
 The CIMA syllabus has the following exams:  
 E1 enterprise operations  
 E2 enterprise management  
 E3 enterprise strategy  
 F1 financial operations  
 F2 financial management  
 F3 financial strategy  
 P1 performance operations  
 P2 performance management  
 P3 performance strategy

Notes to accompany your reading efforts. As a chartered management accountant, you need to be familiar with a wide variety of business management knowledge domains. You do not have to be an expert in each of these domains, but you need to know them well for purpose of the exam, and also for job search. In fact, from a job search site you can find job description like this one: A chartered management accountant applies the principles of accounting to provide the financial information necessary for the planning and financial protection of organizations in the public and private sectors. They establish and maintain financial policies and management

information systems, as well as liaise with management colleagues on all aspects of finance. The role combines accounting skills with business management skills. Chartered accountants look to the future (rather than the past, as in auditing). They analyze the performance of a business and advise on how to pre-empt problems, adapt to changing circumstances and improve value. They may work in a finance function or within specialist departments providing financial advice and information to support strategic business decision-making and control. This set of study notes provide you with knowledge

information on the relevant business management domains. As an effective learning aid implemented in the format of study notes, the ExamFOCUS CIMA Study Notes package covers topics relevant to the nine CIMA exams. It is designed to present information in an easy-to-understand, conversational format. Notes are well-written, technically accurate and completely representative of the key information covered by the exams.
