"Affective Health and Masculinities in South Africa explores how different masculinities modulate substance use, interpersonal violence, suicidality, and AIDS as well as recovery cross-culturally. With a focus on three male protagonists living in very distinct urban areas of Cape Town, this comparative ethnography shows that men's struggles to become invulnerable increase vulnerability. Through an analysis of masculinities as social

assemblages, the study shows how affective health problems are tied to modern individualism rather than African 'tradition' that has become a cliché in Eurocentric gender studies. Affective health is conceptualized as a balancing act between autonomy and connectivity that after colonialism and apartheid has become compromised through the imperative of self-reliance. This book provides a rare perspective on young men's vulnerability in everyday life that may affect the reader and spark discussion about how masculinities in relationships shape physical and psychological health. Moreover, it shows how men change in the face of distress in ways that may look different than global health and gender transformative approaches envision. Thick descriptions of actual events over the life course make the study accessible to both

graduate and undergraduate students in the social sciences. Contributing to current debates on mental health and masculinity, the volume will be of interest to scholars from a number of disciplines including anthropology, gender studies, African studies, psychology and global health"--

The New York Times bestseller—"a rollicking account" (The Kansas City Star) of the infamous baseball game between the Yankees and Royals in which a game-winning home run was overturned and set off one of sports history's most absurd and entertaining controversies. On July 24, 1983, during the finale of a heated four-game series between

the dynastic New York Yankees and small-town Kansas City Royals, umpires nullified a go-ahead home run based on an obscure rule, when Yankees manager Billy Martin pointed out an illegal amount of pine tar—the sticky substance used for a better grip—on Royals third baseman George Brett’s bat. Brett wildly charged out of the dugout and chaos ensued. The call temporarily cost the Royals the game, but the decision was eventually overturned, resulting in a resumption of the game several weeks later that created its own hysteria. The game was a watershed moment, marking a change in the sport, where benign cheating tactics like spitballs, Superball bats, and a couple extra inches of tar on an ash bat, gave way to era of soaring salaries, labor strikes, and rampant use of performance-enhancing drugs. In *The Pine Tar Game* acclaimed sports writer Filip Bondy

paints a portrait of the Yankees and Royals of that era, replete with bad actors, phenomenal athletes, and plenty of yelling. Players and club officials, like Brett, Goose Gossage, Willie Randolph, Ron Guidry, Sparky Lyle, David Cone, and John Schuerholz, offer fresh commentary on the events and their take on the subsequent postseason rivalry. “A sticky moment milked for all its nutty, head-shaking glory” (*Sports Illustrated*), *The Pine Tar Game* examines a more innocent time in professional sports, and the shifting tide that resulted in today’s modern iteration of baseball. Some watchers of the Royals’ 2015 World Series win over New York’s “other baseball team,” the Mets, may see it as sweet revenge for a bygone era of talent flow and umpire calls favoring New York.

Antoine of Oregon : A Story of the Oregon Trail
The author of this series of stories for children has endeavored simply to show why and how the descendants of the early colonists fought their way through the wilderness in search of new homes. The several narratives deal with the struggles of those adventurous people who forced their way westward, ever westward, whether in hope of gain or in answer to "the call of the wild," and who, in so doing, wrote their names with their blood across this country of ours from the Ohio to the Columbia. To excite in the hearts of the young people of this land a desire to know more regarding the building up of this great nation, and

at the same time to entertain in such a manner as may stimulate to noble deeds, is the real aim of these stories. In them there is nothing of romance, but only a careful, truthful record of the part played by children in the great battles with those forces, human as well as natural, which, for so long a time, held a vast 4 portion of this broad land against the advance of home seekers. With the knowledge of what has been done by our own people in our own land, surely there is no reason why one should resort to fiction in order to depict scenes of heroism, daring, and sublime disregard of suffering in nearly every form.

How to Spot a Bastard by His Star Sign Lulu.com
Rose is a princess, a Cinder, and half-human. She is the last one born of her kind, and on her twenty-first birthday, she must enter the woods and travel to find her Prince, as her sisters did before her. ". . . And we will all dance at the Grand Ball," her sisters would always say. But the Human servants are keeping a secret that could prevent the Cinders from reaching their Happily Ever After....Hidden in Rose's dreams and vision are the answers of the past between Cinders and Humans, and she is quickly running out of time trying to solve their hidden messages. She knows the answer lies in her first clue--identifying an animal she has never seen before--that persistent vision of a furry white animal, holding a gold metal object and exclaiming, "Oh dear! Oh dear! I shall be too late!"

You are holding a collection of stories, the aim of this collection is to equip and inspire you to make a positive impact in your own community, through relationships and creative initiatives. In this material, you will read about Dave and Will who developed gardens on wasteland in inner city London council estates, encouraging residents to be part of the process of renewal and creativity by growing plants and vegetables. Will hosts community harvest feasts, bringing together local residents to eat their own locally-grown produce. Andy in his 20s, started a lunch club for isolated elderly people, rallying his student friends to help serve homemade meals in a borrowed church hall. Pauline responded to a news bulletin about the lack of housing for refugees and asylum seekers, by setting up homes across North London to provide safe housing. Annie set up regular meals in her church building for homeless people and rough sleepers. Mark started a football club for local lads from an estate in London, most of whom were from extremely difficult backgrounds and not in education or employment. Countless others have weeded gardens for families referred by social services, mentored children in foster care and painted a wall in a refuge. Abroad, Mick and Ruby moved into an inner city slum community in the heart of Manilla for 9 years

with their young children. At the heart of City Lights are stories and friendships. Find out more about City Lights. regenerateuk.co.uk

“The ancestors are out there...you have to believe me.” From acclaimed author Scott Sigler—New York Times bestselling creator of *Infected* and *Contagious*—comes a tale of genetic experimentation’s worst nightmare come true. Every five minutes, a transplant candidate dies while waiting for a heart, a liver, a kidney. Imagine a technology that could provide those life-saving transplant organs for a nominal fee ... and imagine what a company would do to get a monopoly on that technology. On a remote island in the Canadian Arctic, PJ Colding leads a group of geneticists who have discovered this holy grail of medicine. By reverse-engineering the genomes of thousands of mammals, Colding's team has dialed back the evolutionary clock to re-create humankind’s common ancestor. The method? Illegal. The result? A computer-engineered living creature, an animal whose organs can be implanted in any person, and with no chance of transplant rejection. There's just one problem: these ancestors are not the docile herd animals that Colding's team envisioned. Instead, Colding’s work has given birth to something big, something evil. With

these killer creatures on the prowl, Colding and the woman he loves must fight to survive — even as government agents close in to shut the project down, and the deep-pocketed company backing this research proves to have its own cold-blooded agenda. As the creators become the prey in the ultimate battle for survival, Scott Sigler takes readers on the ultimate thrill-ride—and offers a chilling cautionary account of what can happen when hubris, greed, and madness drive scientific experimentation past the brink of reason.

Cad

You know him. He's the funny, sweet guy with the great eyes who asks you a million questions and seems mesmerized by every reply. He takes you on the greatest, longest date of your life. He swears he loves cats and cuddling. And his apartment is so clean. He just might be the One. Then he doesn't call, doesn't write. He sees you coming down the street and he hides behind a tree. He's a cad. And this is his story. After all the girl's guides

to sex in the city, here - at last - is the view from the other side of the bed. In *Cad: Confessions of a Toxic Bachelor*, Rick Marin offers himself up for an in-depth look at man's superficial nature. In this rollicking, frequently insensitive and ultimately poignant memoir, Marin proves a master of the light touch even in his darkest hours. Part Hugh Hefner, part Hugh Grant, his tale is a rake's progress (in spite of himself) from incorrigible cad to reconstructed romantic. It is one man's story but many men will read it as their own. And for any woman who has ever wondered What was he thinking? This is what he was thinking.
