Clinical research management including the management of clinical trials is a complex activity involving several different individuals with varying educational and professional backgrounds. Research investigators, clinical research coordinators, research nurses, monitors, IRB staff, regulatory personnel, to name a few, all play an important role in clinical trial and clinical research management. . The Society of Clinical Research Associates (SOCRA) provides an important forum for the education, and training of clinical research professionals. A significant component of this training is the certification exam which results in the CCRP (Certified Clinical Research Professional) designation. This designation is particularly important to clinical research coordinators and research nurses who provide the main site-associated support for clinical trial and clinical research management. The certification serves as an important milestone in career development and can assist clinical research coordinators in careers in both academic and teaching hospitals, CROS, as well as within the pharmaceutical industry.The examination evaluates knowledge, understanding, and application of the conduct of clinical research and clinical trials involving humans. It tests the familiarity with "the International Conference on Harmonisation Guideline for Good Clinical Practice (E6) (ICH/GCP), ICH Clinical Safety Data Management: Definitions and Standards for Expedited Reporting (E2A), the United States Code of Federal Regulations (CFR) and the ethical principles that guide

clinical research consistent with the principles of the Nuremberg Code, the Belmont Report and the Declaration of Helsinki."This workbook provides one tool for the preparation and study for the CCRP examination. The book addresses the key issues in in ICH-GCP , federal regulations outlined in statutes including Title 45 part 46 (Protection of Human Subjects) , Title 21 part 50 (Protection of Human Subjects), Title 21 part 56 (Institutional review Boards) Title 21 part 54 (Financial Disclosures by Clinical Investigators) . Also addressed are key FDA statutes involved in the regulation of clinical trials Title 21 part 312 (Investigational New Drug Application), Tile 21 part 812 (Investigational Device Exemptions) and Title 21 part 11(Electronic Records and Electronic Signatures). The CCRP exam covers material based not only on these regulations but also on guidances issued by OHRP and the FDA The workbook is organized in distinct chapters each of which covers one aspect of the regulations or guidances. The multiple choice questions are deliberately designed to instruct on core materials rather than offering linguistically ingenious choices. The workbook is therefore designed not only to prepare for the CCRP examination but also to educate clinical research professionals, particularly clinical research coordinators and research nurses on matters which arise frequently in clinical research management and administration.

The corrosion of carbon steels in amine units used for gas treatment in refining operations is a major problem for the petrochemical industry. Maximising amine unit reliability, together with improving throughput, circulation and treatment capacity, requires more effective ways of measuring and predicting corrosion rates. However, there has been a lack of data on corrosion. This valuable report helps to remedy this lack of information by summarising findings from over 30 plants. It covers such amine types as methyl diethanolamine (MDEA), diethanolamine (DEA), monoethanolamine (MEA) and di-isopropanolamine (DIPA), and makes recommendations on materials and process parameters to maximise amine unit efficiency and reliability. Practical Power System Operation iUniverse GIS for Critical Infrastructure Protection highlights the GIS-based technologies that can be used to support critical infrastructure protection and emergency management. The book bridges the gap between theory and practice using real-world applications, real-world case studies, and the authors' real-world experience. Geared toward infrastructure owners and first responders and their

agencies, it addresses gaps in the response, recovery, preparedness planning, and emergency management of large-scale disasters. It also explains the first principles of CIP, introduces the basic components of GIS, and focuses on the application of GIS analysis to identify and mitigate risk and facilitate remediation. In addition, it offers suggestions on how geospatial and emergency response communities can come together—and with combined knowledge—work toward viable solutions for future improvements. Provides a narrative of critical lessons learned through personal experience during the response to Hurricane Katrina Contains examples demonstrating how geospatial technologies may be applied to fire service Summarizes lessons learned from ten community collaboration studies GIS for Critical Infrastructure Protection serves as a reference for infrastructure owner's police, fire, paramedics, and other government agencies responsible for crisis and emergency response, and critical infrastructure protection. The book benefits first responders and

SSCP from solutions@syngress.com The accompanying Web site will provide students with realistic exam-simulations software. The exam will emulate the content and the look and feel of the real-exam. Students will be able to grade their performance on the Web-based exam and automatically link to the accompanying e-book for further review of difficult

concepts Ø $2,000 worth of training in a $60 book, DVD, and Web-enhanced training system. Consumers of this product will receive an unprecedented value. Instructor-led training for similar certifications averages $2,000 per class, and retail DVD training products are priced from $69 to $129. Consumers are accustomed to paying 20% to 100% more than the cost of this training system for only the DVD! Ø Changes to the CISSP Certification pre-requisites will result in an increase in the popularity of the SSCP certification. Recently the (ISC)2 increased the work experience requirement of the CISSP certification to four years from three years. This increase will result into current candidates for the CISSP to shift to the SSCP certification, as the verifiable field requirement is only one year. Ø Syngress well-positioned in wide open playing field. The landscape of certification publishing has changed dramatically over the past month with Coriolis ceasing operations, Hungry Minds facing an uncertain future after their acquisition by John Wiley & Sons, and Syngress ending its long-term relationship with Osborne McGraw Hill in pursuit of publishing Study Guides independently. We are confident that Syngress' long history of best-selling Study Guides will continue in this new era.
