The aim of this book is to provide a single source of information to support continuing professional development (CPD) in the built environment sector. The book offers a comprehensive introduction to the concept of CPD and provides robust guidance on the methods and benefits of identifying, planning, monitoring, actioning, and recording CPD activities. It brings together theories, standards, professional and industry requirements, and contemporary arguments around individual personal and professional development. Practical techniques and real-life best practice examples outlined from within and outside of the industry empower the reader to take control of their own built environment-related development, whilst also providing information on how to develop fellow staff members. The contents covered in this book align with the requirements of numerous professional bodies, such as the Royal Institution of Chartered Surveyors (RICS), the Institution of Civil Engineers (ICE), and the Chartered Institute of Builders (CIOB). The chapters are supported by case studies, templates, practical advice, and guidance. The book is designed to help all current and future built environment professionals manage their own CPD as well as managing the CPD of others. This includes helping undergraduate and postgraduate students complete CPD requirements for modules as part of a wide range of built environment university degree courses and current built environment professionals of all levels and disciplines who wish to enhance their careers through personal and professional development, whether due to professional body requirements or by taking control of identifying and achieving their own educational needs.

This comprehensive book serves as a review for the Fellow of Interventional Pain Practice (FIPP) exam and functions as a concise guide for all interventional pain doctors. Through educational initiatives, it helps to promote consensus-building among experts on the effectiveness of existing techniques and avenues for advancement of therapeutic performances. The book is divided into four sections (head and neck, thoracic, lumbar and sacral/pelvic), and each chapter is devoted to the safe, standardized approach to interventional procedures. To prepare both the examiner and the examinee for the FIPP examination, each chapter contains the relevant C-arm images and outlines the most common reasons for "unacceptable procedures performance" and "potentially unsafe procedures performance." Distinguishing it from many of the previous guides, it also includes labeled fluoroscopic high quality images and focuses on the current FIPP-examined procedures with all accepted approaches. Written and edited by world leaders in pain, Interventional Pain guides the reader in study for FIPP Exam and offers a consensus on how interventional procedures should be performed and examined.

The Manual of Tests and Criteria contains criteria, test methods

and procedures to be used for classification of dangerous goods according to the provisions of Parts 2 and 3 of the United Nations Recommendations on the Transport of Dangerous Goods, Model Regulations, as well as of chemicals presenting physical hazards according to the Globally Harmonized System of Classification and Labelling of Chemicals (GHS). As a consequence, it supplements also national or international regulations which are derived from the United Nations Recommendations on the Transport of Dangerous Goods or the GHS. At its ninth session (7 December 2018), the Committee adopted a set of amendments to the sixth revised edition of the Manual as amended by Amendment 1. This seventh revised edition takes account of these amendments. In addition, noting that the work to facilitate the use of the Manual in the context of the GHS had been completed, the Committee considered that the reference to the "Recommendations on the Transport of Dangerous Goods" in the title of the Manual was no longer appropriate, and decided that from now on, the Manual should be entitled "Manual of Tests and Criteria".

This volume is a collection of selected empirical studies on determinants of economic growth in Africa. Grouped into three parts, chapters examine the influence of financial sources and economic growth; sources of productivity growth; and prices, exchange rates and trade relationships with growth in regions in Africa or the continent as a whole. This edited book is authored by African experts in the field who employ diverse up-to-date data and methods to provide robust empirical results based on representative firms, household surveys and secondary country level data covering individuals or multiple countries on the continent. It contains a wealth of empirical evidence, deep analyses and sound recommendations for policymakers and researchers for designing and implementing effective social and national policies and strategies to prevent and to reduce poverty and its negative effects on poor households and in poor regions. The volume will be a useful resource for policymakers and researchers involved in promoting economic growth and fighting poverty. It will also appeal to a broader audience interested in economic development, resource economics, policies, economic welfare and inclusive growth.

Written by two experienced RCOG examiners, both of whom have been involved in the development of the new Part 3 MRCOG examination, this book is essential reading for any trainee preparing to sit the exam. The authors clearly describe the breadth and depth of the curriculum modules and the professional behaviours that will be assessed in the five clinical skills domains. The text includes written examples of every module, links to eight videos showing candidates attempting four real Part 3 tasks, examiners' comments, and a detailed discussion of each example. The content will help candidates understand what is required to pass the examination and how to demonstrate their knowledge and skills to best effect. The book will also be useful for trainers preparing their trainees for the new exam. Based on the principles of good medical practice, there are practical tips here for doctors and obstetricians at all levels.

The field of computer science (CS) is currently experiencing a surge in undergraduate degree production and course enrollments, which is straining program resources at many institutions and causing concern among faculty and administrators about how best to respond to the rapidly growing demand. There is also significant interest about what this growth will mean for the future of CS programs, the role of computer science in academic institutions, the field as a whole, and U.S. society more broadly. Assessing and Responding to the Growth of Computer Science Undergraduate Enrollments seeks to provide a better understanding of the current trends in computing enrollments in the context of past trends. It examines drivers of the current enrollment surge, relationships between the

surge and current and potential gains in diversity in the field, and the potential impacts of responses to the increased demand for computing in higher education, and it considers the likely effects of those responses on students, faculty, and institutions. This report provides recommendations for what institutions of higher education, government agencies, and the private sector can do to respond to the surge and plan for a strong and sustainable future for the field of CS in general, the health of the institutions of higher education, and the prosperity of the nation.

Contract management is a key management skill, yet it is underplayed in most organizations, which usually default to project management skills as a proxy for contract management skills. Whilst project management skills are equally essential, they are not the same thing. Contract Management looks at the wider contract management picture from an industrial-commercial perspective, and helps set-out typical structures and processes that assist the contract management task. The author uses diagrammatic representations to depict complex ideas. Contract Management includes "learning points" in each chapter, looking at handling problems, procedural changes and enhancing commercial performance.

All purchasing activities take place within a context of legal regulation, a context that has been taking on increasing importance in recent years. This book provide a clear and concise account of the underlying legal principles which affect the purchasing function. A new component of the third edition is an additional appendix which contains recent cases involving procurement law issues. These are kept separate from the main body of the book and are not essential for purposes of revising for the Legal Aspects exam. However, they do provide useful examples of how the courts have been interpreting the law in relation to a wide range of procurement activities in the recent past. These include the EU public procurement rules, contract formation, assessment of claimable damages, limitations of liability, the Transfer of Undertakings (Protection of Employment) Regulations, the Freedom of Information Act, and the Late Payment of Commercial Debts (Interest) Act.
