Hi . From the above URL . The PFC3-based mls qos global command is replaced with the auto qos default global command, which is used for enabling QoS just at the port level and not at the PFC level.

7.2 Default State of Port Level QoS . My question is. Auto QoS is CoS based. We require the ports (uplink ports) to possibly pass DSCP transparently, that is possibly received from access switches. [Catalyst 6500 Release 12.2SX Software Configuration Guide](#)
