My system for determining what kind of code to use in an ISE deployment usually involves pulling up the ISE Compatibility Matrix and then comparing on the Cisco.com Downloads page for that platform. If there is a general TAC recommended version of code for that platform and it's close to the validated version in the compatibility matrix, that's what I will deploy in production.

Cisco Design and Implementation Guides (DIGs) can be found in the Cisco Design Zone. Many of these designs are Cisco Validated Designs (CVDs) that include internal or external testing, some are reference designs, and some are visionary architectures or best practices documented by experienced engineers.

This guide will also use the convention of LHS as shorthand for “ Left-Hand Side ” and RHS for “ Right-Hand Side ” when referring to left and right panels in the ISE administrative interface, respectively.
