This book provides a critical analysis of the role of cities in addressing climate change and the prospects for urban sustainability. In the post-Rio era, international organizations and transnational networks have promoted the need for local action on global environmental issues.  
Landing page - SA Cities  
The Global Environments Network (GEN) supports, nurtures and connects inspiring changemakers who are innovating solutions to apparently intractable environmental and social problems. Working from local to global scales, they are drawing on superb academic backgrounds and inspiring field experiences to develop practical actions — typically out of the public eye — that improve local livelihoods, resolve conflicts and restore environments.
