The open ocean--that vast expanse
of international waters--spreads
across three-fourths of the globe. It

is a place of storms and danger, both natural and manmade. And at a time when every last patch of land is claimed by one government or another, it is a place that remains radically free. With typically understated lyricism, William Langewiesche explores this ocean world and the enterprises--licit and illicit--that flourish in the privacy afforded by its horizons. But its efficiencies are accompanied by global problems--shipwrecks and pollution, the hard lives and deaths of the crews of the gargantuan ships, and the growth of two pathogens: a modern and sophisticated strain of piracy and its close cousin, the maritime form of the new stateless terrorism. This is the outlaw sea that Langewiesche brings startlingly into

view. The ocean is our world, he reminds us, and it is wild.

“Lake Wobegon Days is about the way our beliefs, desires and fears tail off into abstractions--and get renewed from time to time. . . this book, unfolding Mr. Keillor's full design, is a genuine work of American history.” —The New York Times “A comic anatomy of what is small and ordinary and therefore potentially profound and universal in American

life...Keillor’s strength as a writer is to make the ordinary extraordinary.” —Chicago Tribune “Keillor’s laughs come dear, not cheap, emerging from shared virtue and good character, from reassuring us of our neighborliness and strength....His true subject is how daily life is shot with grace. Keillor writes a prose that can be turned to laughter, to tears...to compassion or satire, to a hundred effects. He is a brilliant parodist.” —San Francisco Chronicle

David Livingstone (1813-73) was a Scottish missionary and medical doctor who explored much of the interior of Africa. In a remarkable journey in 1853-56, he became the first European to cross the African continent. Starting on the Zambezi River, he traveled north and west across Angola to reach the Atlantic at Luanda. On his return journey he followed the Zambezi to its mouth on the Indian Ocean in present-day Mozambique. Livingstone's most famous expedition was in 1866-73, when he explored central Africa in an attempt to find the

source of the Nile. Not heard from for years, he was believed lost. Both the Royal Geographical Society and the sensationalist New York Herald organized expeditions to find him. Henry M. Stanley (1841-1904), a British-born reporter who was to become a noted explorer in his own right, led the Herald's expedition. On November 10, 1871, Stanley found Livingstone in the town of Ujiji, on the shores of Lake Tanganyika, in present-day Tanzania. News of the discovery caused a worldwide sensation. This book, which appeared in Chicago in 1872,

was part of the effort by publishers to capitalize on the demand from the public for information about Livingstone and Stanley and about Africa in general.

The phenomena of Japan emerging as one of the most competitive industrial nations in the twentieth century and the general shift of competitiveness to East Asia since the 1980s have

been widely studied by many scholars from different fields of the social sciences. Drawing on sources from Japanese, Swiss, and American archives, the historical analysis of this book tackles a wide range of actors and sheds light on the various processes that enabled Japanese watch companies to transfer technology and expand commercially starting in the second half of the nineteenth century. By exploring the case of the watch industry, this book serves to establish a

better understanding of the origins of the competitiveness of Japanese manufacturing and its evolution until its decline in the post-bubble economy (in the 1990s and 2000s). Sport Diver Taylor & Francis
