In France's Third Republic, secularism was, for its adherents, a new faith, a civic religion founded on a rabid belief in progress and the Enlightenment conviction that men (and women) could remake their world. And yet with all of its pragmatic smoothing over of the supernatural edges of Catholicism, the Third Republic engendered its own fantastical ways of seeing by embracing observation, corporeal dynamism, and imaginative introspection. How these republican ideals and the new national education system of the 1870s and 80s - the structure meant to impart these ideals - shaped belle époque popular culture is the focus of this book. The author reassesses the meaning of secularization and offers a cultural history of this period by way of an interrogation of several fraught episodes which, although seemingly disconnected, shared an attachment to the potent moral and aesthetic directives of French republicanism: a village's battle to secularize its schools, a scandalous novel, a vaudeville hit featuring a nude celebrity, and a craze for female boxing. Beginning with the writer and performer Colette (1873–1954) as a point of entry, this re-evaluation of belle époque popular culture probes the startling connections between republican values of labor and physical health on the one hand, and the cultural innovations of the decades preceding World War I on the other.

Since the large-scale manufacture of personal timepieces began, industry leadership has shifted among widely disparate locations, production systems, and cultures. This book recounts the story of the quest for supremacy in the manufacture of watches--from the cottage industries of Britain; to the preeminence of Switzerland and, later, the United States; to the high-tech plants of Japan and the sweatshops of Hong Kong. Glasmeier examines both the strategies adopted by specific firms and the interplay of such varying influences as technological change, cyclical economic downturns, war, and national trade policies. In so doing, she delineates a cohesive framework within which to address such broader questions as how sustained regional economic development takes place (or starts and then stops); how decisions made by corporations are structured by internal and external forces; and the ways industrial cultures with different strategic learning capabilities facilitate or thwart the pursuit of technological change.

The definitive introduction to game theory This comprehensive textbook introduces readers to the principal ideas and applications of game theory, in a style that combines rigor with accessibility. Steven Tadelis begins with a concise description of rational decision making, and goes on to discuss strategic and extensive form games with complete information, Bayesian games, and extensive form games with imperfect information. Dealing with a complicated watch used to be a rare job for the watch repairer, but with the popularity of the automatic, it is almost commonplace. Furthermore, the increased interest in calendar work, alarm watches, and chronographs will undoubtedly bring more and more complicated work into the workshop. This book deals with complicated work essentially from the repairer's point of view. The action of each mechanism is briefly and clearly described because understanding this is essential to proper servicing, repair and testing for functioning. Dismantling and assembly instructions are given, as well as oiling charts and - most important - hints on fault-finding and their rectification. Another essential feature of the book is that it deals with all complicated work - from the relatively simple automatic to the triple-complicated watch with chronograph, calendar and repeater work, and the very complicated clock watch. Exceptional care has been taken in the preparation of diagrams, which have been drawn from actual movements in various stages of assembly, so that the reader can actually work with the book illustrations beside the watch itself. As always with books by Donald de Carle, instructions are easy to follow and there is no reason why anyone well versed in ordinary work and able to use watchmakers' tools should not become a specialist in complicated watches and their repair.

First published in 1999. As with the other volumes in this series, readers will appreciate the clear and compelling way this case study is presented. Reed critiques the way in which political and economic dynamics not only threaten, but convolute the intended benefits of community policing. Although you may not always agree with the author's interpretations, he has given us a compelling look at the potential for corruption of model programs.

From corrupt world politics to global pandemics to an unprecedented rebellion against God and His Word, humanity has reached a critical stage. What happens next? In this eye-opening book, Jimmy Evans examines biblical prophecies about the end times and points to their unmistakable parallels with today's world. - Will Christians go through the Tribulation?
- What role does Israel play in God's prophetic plan?
- Are COVID-19 and other world events announcing the imminent return of Jesus?

Ultimately, Tipping Point will help you understand current events with confidence. There is no going back, but hope and peace are possible as God's plan unfolds and we approach the end of the age. Jimmy Evans is senior pastor of Gateway Church in the Dallas/Fort Worth Metroplex and holds an honorary doctorate of literature from The King's University.
