The contributors to this volume have collaborated to present their work on introducing competences in intercultural communication and citizenship into foreign language education. The book examines how learners and teachers think about citizenship and interculturality, and shows how teachers and researchers from primary to university education can work together across continents to develop new curricula and pedagogy. This involves the creation of a new theory of intercultural citizenship and a procedure for implementation. The book is written by teacher researchers who aim to help other teachers, and concludes with reflections on the lessons they have learnt which will help others to implement these ideas in their own practice. The book is essential reading for foreign language educators and researchers, students in pre-service teacher training and teachers in in-service training.

#### Pulled Over Capstone

This book sheds new light on gender-based inequalities in a globalized world. Interdisciplinary in scope, it reveals new avenues of research on gendered citizenship, analysing the possibilities and pitfalls of being represented and of representing someone. Drawing on contexts both historical and contemporary, it queries what it means to have access to representation, which power structures regulate and produce representation, and who counts as a citizen. Situating its arguments in the global struggle for hegemony, it answers such thought-provoking questions as whether one can represent someone or be represented without recourse to citizenship and, conversely, whether it is possible to be a citizen if one does not have access to representation. This engaging edited collection will appeal to students and scholars of sociology, social anthropology, history, media studies, political science, literature, gender studies and cultural studies.

With awareness of both the opportunities and challenges presented by globalization, there is a growing trend among colleges and universities across the country to commit goals and resources to the concept of internationalizing their campuses. This can occur in a number of different ways but a common thread involves exploring the concept of global citizenship and finding ways to embed this concept in undergraduate curricula. For faculty, this may call for moving out of a presumed comfort zone in the traditional classroom and determining new approaches to teaching a generation of students who will live and work in a more global context. A method for accomplishing this work that is growing in popularity involves offering short-term, faculty-led field courses to international settings. In fact, today more college students are participating in such short-term study abroad opportunities than the more traditional semester and/or yearlong programs. Faculty and administrators who want to capitalize on short-term, study abroad programs as a means for internationalizing their campuses need practical resources to help them realize this challenging but important goal. They not only need support in developing the course curricula and logistics, but also in constructing authentic means for assessing the multi-faceted learning that occurs. Short-term international programs, when carefully planned and executed, engage the participants (both students and faculty) in unique learning experiences that can involve service, research, and critical analysis of what it truly means to be a global citizen. Such work helps define the somewhat nebulous but worthy goals of internationalizing campuses and fostering global citizenship. The authors of this text are professional educators with deep experience in global education and curriculum development. They offer a valuable resource for the development, execution and assessment of faculty-led international field courses that is at once theoretical, practical and motivational. Whether readers are considering offering an international field program for the first time and need guidance; are veteran field course leaders who would like to take their work to the next level; or are administrators attempting to encourage and provide needed support for faculty-led international programs, this book will prove invaluable.

Classic Books Library presents this brand new edition of "The Federalist Papers", a collection of separate essays and articles compiled in 1788 by Alexander Hamilton. Following the United States Declaration of Independence in 1776, the governing doctrines and policies of the States lacked cohesion. "The Federalist", as it was previously known, was constructed by American statesman Alexander Hamilton, and was intended to catalyze the ratification of the United States Constitution. Hamilton recruited fellow statesmen James Madison Jr., and John Jay to write papers for the compendium, and the three are known as some of the Founding Fathers of the United States. Alexander Hamilton (c. 1755–1804) was an American lawyer, journalist and highly influential government official. He also served as a Senior Officer in the Army between 1799-1800 and founded the Federalist Party, the system that governed the nation's finances. His contributions to the Constitution and leadership made a significant and lasting impact on the early development of the nation of the United States.
