Although we live in a period of unprecedented globalization and mass migration, many contemporary western liberal democracies are asserting their sovereignty over who gets to become members of their polities with renewed ferocity. Citizenship matters more than ever. In this book, Elizabeth F. Cohen and Cyril Ghosh provide a concise and comprehensive introduction to the concept of citizenship and evaluate the idea 's continuing relevance in the 21st century. They examine multiple facets of the concept, including the classic and contemporary theories that inform the practice of citizenship, the

historical development of citizenship as a practice, and citizenship as an instrument of administrative rationality as well as lived experience. They show how access to a range of rights and privileges that accrue from citizenship in countries of the global north is creating a global citizenship-based caste system. This skillful critical appraisal of citizenship in the context of phenomena such as the global refugee crisis, South-North migration, and growing demands for minority rights will be essential reading for students and scholars of citizenship, migration studies and democratic theory.

All social work practice, from intervention to how payments or reimbursements are made, is regulated by social policies.

Professionals, however, cannot arbitrarily select which policy to follow in any circumstance; knowing what comprises a given policy is essential, but equally important is understanding how to amend a policy by applying unique skills that reflect the social work profession's shared values and beliefs. Recognizing that a series of interdependent social policies govern every aspect of social work in both nonprofit and public organizations, this practice-specific textbook focuses on influencing social policies in an agency setting or through formal governmental processes. The Handbook for Policy Practice explores a wide range of topics that are critical tools in every social worker's policy practice repertoire: Recognizing the various social justice theories and their role in social policy. Understanding critical thinking as a practice skill. Social media as a practice tool. Preparing and presenting testimony to a legislative committee or group of

people. Formulating a clear, well-focused written policy brief for a Board of Directors or legislative committee. Organizing policy specific advocacy activities including a public forum, social work day at the legislature, and voter registration projects. The "30-second elevator speech." Writing newspaper "op-eds" and "letters to the editor." Purposefully, the Handbook also relies on information comes from the digital world. Using the web as a primary source builds on the social work profession's long-held belief to begin where the client is. Using the links to the various data and citation sources, readers will learn to identify and discern the features of a valid web site. As a whole, this book is an essential resource for all BSW and MSW students.

National Service (NS) is one of Singapore's foundational public policies. First implemented by the British in 1954, amended in 1967 to provide a means to defend a fledgling independent nation, and codified into its present form in 1970, NS is a key pillar of Singapore's defence. Its significance, however, goes beyond defence. With over 1 million male Singapore citizens and permanent residents having served NS, and consequently involving many more — family members, friends, employers and colleagues — in different ways, NS is deeply woven into Singapore's political and social fabric. This volume brings together a range of scholarly perspectives on NS which explore its past, present and future in four sections: The history of NS, NS in practice, debates on NS and an international perspective. Comprising chapters by individuals from varied backgrounds, National Service in Singapore offers a broad account of one of Singapore's oldest public policies.

Punishing the Other draws on the work of Zygmunt Bauman to discuss contemporary discourses and practices of punishment and criminalization. Bringing together some of the most exciting international scholars, both established and emerging, this book engages with Bauman's thesis of the social production of immorality in the context of criminalization and social control and addresses processes of 'othering' through a range of contemporary case studies situated in various cultural, political and social contexts. Topics covered include the increasing bureaucratization of the business of punishment with the corresponding loss of moral and ethical reflection in the public sphere; punitive discourses around border control and immigration; and exclusionary discourses and their consequences concerning 'terrorists' and other socially and culturally defined outsiders. Engaging with national and global issues that are more topical now than ever before, this book is essential reading for academics and students of involved in the study of the sociology of punishment, punishment and modern society,

the criminal justice system, philosophy and punishment, and comparative criminology and penology.

Civil Society Engagement: Achieving Better in Canada examines the process and outcomes of a particular series of civil society activism and establishes a conceptual framework through an examination of Canadian politics and societal change. Relying on qualitative and ethnographic research, document analysis and reviews of policies, the contributions focus on social possibilities, legal limits and societal roles to illuminate the national asset of human solidarity evident in civil society activism in Canada. Patricia Daenzer and her expert contributors challenge the romanticism of 'the perfected welfare democracy' and contend that civil society activism leads to the authentication of democracy. The premise is that Canadian political and policy inconsistencies fail to protect some and civil society intervention is essential for the realignment and redefinition of articulated national principles and redistributive outcomes. Although Canada is shown ultimately to be guarded in its welfare commitment, this 'guarded' progress in welfare democracy would not be possible without the activism of segments of civil society. Civil Society Engagement: Achieving Better in Canada demystifies civil society activism and urges greater awareness of current social dynamics and involvement in the lives of the most disadvantaged.

Not only are new immigrants and refugees voicing for inclusion, but the very definition of persons with rights has evolved through civil society activism. This book will lead to deliberations about state legal frameworks which impact civil society reach, the purpose and scope of Canadian politics and the potential of civil society in perfecting our democracy.

Challenging agendas in policy and practice SAGE Publications

In today's world, people speak more than 6000 languages and identify with thousands of cultural groups and a large variety of different religions. Despite such a number of differences, these and other features of human diversity are housed politically, inside roughly 200 nation-states. Globally speaking, a diverse citizenry is an unavoidable fact for most countries across the planet. Additionally, developments such as transnational migrations, rising socio-economic inequalities, the "War(s) on Terror", and political movements based on absolutist ideologies continue to raise broader questions of justice, governance, equality, quality of life and social cohesion. As such, recent decades have witnessed a revival of debates concerning what it means to be a "citizen". In response to such trends, nations such as Australia, Canada, and Britain have committed themselves to teaching citizenship through their national curriculums. Moreover, all European Union member states have integrated some form of citizenship education into their primary and secondary curriculums. Acknowledging such

developments, this book uses discussions with citizenship educators as a backdrop for a critical analysis of various conceptions of citizenship, such as liberal, social-democratic, civic-republican, cosmopolitan and multicultural citizenship. It also analyses how these educators approach the contemporary reality of nation states, which are richly composed of a diverse citizenry. Given Britain's transformation into a multi-ethnic and multi-faith society, this book develops, as a case study, an understanding of how religious and cultural difference can be approached. What makes this work unique is that it gleans ideas and research from a wide field of international scholarship, such as political science, philosophy, education, and cultural studies. A further unique aspect of the book is that it uses the q-methodology, a research method used to study people's viewpoints, to reveal some shared perspectives on citizenship. In doing so, the path traced here leads to the discovery of spaces where citizenship educators - despite their ethnic/religious diversity - display "common ground" on values, beliefs and aims related to citizenship. This book will prove to be a useful resource for academics, educators and political leaders, as well as interfaith and civil society professionals at large. It is worth mentioning that even though this book has benefited from the generously contributed ideas of citizenship educators in England, its scholarly research, lessons, arguments, analysis and suggestions, which focus on multi-faith and multi-ethnic societies, will also be useful elsewhere.

American democracy is at a critical crossroads. Rancor, division, and suspicion are the unfortunate byproducts of the contentious 2016 presidential election. The election also bred a measure of civic uncertainty where citizens of all ages struggle to find and define their roles within a functioning democracy. *No Reluctant Citizens: Teaching Civics in K-12 Classrooms* is designed to help social studies teachers reinforce the centrality of civic education through a series of hands-on, participatory, and empowering activities. From civic literacy to human rights, from service learning to controversial issues, *No Reluctant Citizens: Teaching Civics in K-12 Classrooms* explores an array of topics that ultimately provides K-12 students the conceptual and practical tools to become civically engaged.

Malta in the European Union Life in the UK Test : Practice Questions 2014 Questions and Answers for the British Citizenship Test European Citizenship Report This Standard Eurobarometer survey was carried out between 8 and 17 November 2014 in 35 countries and territories: the 28 Member States of the European Union, the six candidate countries

(the Former Yugoslav Republic of Macedonia, Turkey, Iceland, Montenegro, Serbia and Albania) and the Turkish Cypriot Community in the part of the country not controlled by the government of the Republic of Cyprus. The European Commission presided over by Jean-Claude Juncker took office on 1 November 2014. As the votes cast by European citizens in the European elections of May 2014 had influenced the choice of President of the Commission, it is interesting to analyse the evolutions in their answers to the questions on the theme of European citizenship. 2014 was marked by the centenary commemoration of the outbreak of the First World War. Simultaneously, the Ukrainian crisis represents the return of armed conflict on the European Union's doorstep. ^As peace between the Member States is perceived as one of the main achievements of European integration, it is appropriate to examine any changes in the way Europeans define European identity and its values. ^This Standard Eurobarometer survey of autumn 2014 provides some answers, and approaches the theme of European citizenship from the following angles: - Attachment to the European Union; - Perceptions of the

European Union's achievements: what do European citizens see as the European Union's most positive results? - The concepts of European citizenship and identity: do Europeans see themselves as European citizens? How can this feeling be strengthened? Do they know their rights as European citizens? Do they want more information on the subject? - The openness of Europeans: have Europeans travelled to neighbouring EU countries or socialised with other EU citizens, do they take an interest in European culture or shop in other EU countries? - Values: what values do Europeans most readily associate with the European Union? What are their personal values? The full report of the Standard Eurobarometer 82 consists of several volumes.^The first volume presents the main public opinion trends in the European Union. Three other volumes present the opinions of Europeans on other themes: the Europe 2020 strategy; European citizenship; and media use in the European Union. This volume is devoted to European citizenship. The general analysis and the socio-demographic analyses are based on the average results of the 28 Member States. This average is weighted so

that it reflects the population of each Member State. The averages for the previous surveys represent the results obtained in all the Member States of the European Union, as it was composed at the time the survey was conducted.

The Cultural Defense of Nations presents a timely, thought-provoking thesis on some of the most pressing issues of our time-global immigration, majority groups, and national identity. Never in human history has so much attention been paid to human movement. Global migration yields demographic shifts of historical significance, profoundly shaking up world politics-as has been seen in the refugee crisis, the Brexit referendum, and the 2016 U.S. election. The Cultural Defense of Nations addresses one of the greatest challenges facing liberalism today: is a liberal state justified in restricting immigration and access to citizenship in order to protect its majority culture? Liberal theorists and human rights advocates recognize the rights of minorities to maintain their unique cultural identity, but assume that majorities have neither a need for similar rights nor a moral ground for defending them. The majority culture, so

the argument goes, "can take care of itself." And it's only getting worse with a younger generation of Americans who do not see the value in voting. The good news is that the bad news is wrong. In this Third Edition of *The Good Citizen*, Russell Dalton uses current national public opinion surveys, including new evidence from 2018 Pew Center survey data, to show how Americans are changing their views on what good citizenship means. It's not about recreating the halcyon politics of a generation ago, but recognition that new patterns of citizenship call for new processes and new institutions that reflect the values of the contemporary American public. Trends in participation, tolerance, and policy priorities reflect a younger generation that is more engaged, more tolerant, and more supportive of social justice. *The Good Citizen* shows how a younger generation is creating new norms of citizenship that are leading to a renaissance of democratic participation. An important comparative chapter in the book showcases cross-national comparisons that further demonstrate the vitality of American democracy.

However, with more than 250 million immigrants worldwide, majority groups increasingly seek to protect what they consider to be their national identity. In recent years, liberal democracies have introduced proactive immigration and citizenship policies that are designed to defend the majority culture. This book shifts the focus from the prevailing discussion of cultural minority rights and, for the first time, addresses the cultural rights of majorities. It proposes a new approach by which liberal democracies can welcome immigrants without fundamentally changing their cultural heritage, forsaking their liberal traditions, or slipping into extreme nationalism. Disregarding the topic of cultural majority rights is not only theoretically wrong, but also politically unwise. With forms of "majority nationalism" rising and the growing popularity of extreme right-wing parties in the West, time has come to liberally address the new challenge.

This timely Handbook takes stock of the range of debates that characterise the field of international education and development, and suggests key aspects of a research agenda for the next period. It is deliberately divergent in its approach, recognising the major ideological and epistemological divides that characterise a field that draws on many traditions. Leading and emergent voices from different paradigms and contexts are afforded a space to be heard and each section puts current debates in larger historical contexts. The

Handbook is divided in four parts and book-ended by an introduction and a conclusion, the latter oriented towards the implications that the volume has for future research agendas. The first part explores major strands of debates about education's place in development theory. The second acknowledges the disciplining of the field by the education for all movement and examines the place that learning and teaching, and schools play in development. Part three looks beyond schools to consider early years, adult and vocational education but focuses particularly on the return to thinking about higher education's role in development. The final part considers the changing, but still important, role that international cooperation plays in shaping education in developing countries. Featuring over thirty chapters written by leading international and interdisciplinary scholars, the Routledge Handbook of International Education and Development offers the first comprehensive and forward-looking resource for students and scholars.

This volume focuses on the everyday legalities and practicalities of naturalization including governmental processes, the language of citizenship tests and classes, the labelling and lived experiences of immigrants/outsideers and the media's interpretation of this process. The book brings together scholars from a wide range of specialties who accentuate language and raise issues that often remain unarticulated or masked in the media. The contributors highlight how governmental policies and practices affect native-born citizens and residents differently on the basis of legal status. Furthermore, the authors observe that many issues that are typically seen as affecting immigrants (such as language policies, nationalist identities and feelings of belonging) also impact first-generation native-born citizens who are seen as, or see themselves as, outsideers.

Contrary to predictions that it would become increasingly redundant in a globalizing world, citizenship is back with a vengeance. The Oxford Handbook of Citizenship brings together leading experts in law, philosophy, political science, economics, sociology, and geography to provide a multidisciplinary, comparative discussion of

different dimensions of citizenship: as legal status and political membership; as rights and obligations; as identity and belonging; as civic virtues and practices of engagement; and as a discourse of political and social equality or responsibility for a common good. The contributors engage with some of the oldest normative and substantive quandaries in the literature, dilemmas that have renewed salience in today's political climate. As well as setting an agenda for future theoretical and empirical explorations, this Handbook explores the state of citizenship today in an accessible and engaging manner that will appeal to a wide academic and non-academic audience. Chapters highlight variations in citizenship regimes practiced in different countries, from immigrant states to 'non-western' contexts, from settler societies to newly independent states, attentive to both migrants and those who never cross an international border. Topics include the 'selling' of citizenship, multilevel citizenship, in-between statuses, citizenship laws, post-colonial citizenship, the impact of technological change on citizenship, and other cutting-edge issues. This Handbook is the major reference work for those engaged with citizenship from a legal, political, and cultural perspective. Written by the most knowledgeable senior and emerging scholars in their fields, this comprehensive volume offers state-of-the-art analyses of the main challenges and prospects of citizenship in today's world of increased migration and globalization. Special emphasis is put on the question of whether inclusive and egalitarian

citizenship can provide political legitimacy in a turbulent world of exploding social inequality and resurgent populism.
