Jeremy Clarkson gets really riled in Round the Bend What's it like to drive a car that's actively trying to kill you? This and many other burning questions trouble Jeremy Clarkson as he sets out to explore the world from the safety of four wheels. Avoiding the legions of power-crazed traffic wombles attempting to block highway and byway, he: • Shows how the world of performance cars may be likened to Battersea Dogs' Home • Reveals why St Moritz may be the most bonkers town in all of the world • Reminds us that Switzerland is so afraid of snow that any flakes falling on the road are immediately arrested • Argues that washing a car is a waste of time Funny, globe-trotting, irreverent and sometimes downright rude, Round the Bend is packed with curious and fascinating but otherwise hopelessly useless stories and facts about everything under the sun (and just occasionally cars). It's Jeremy Clarkson at his brilliant best. Round the Bend is a collection of Jeremy's motoring journalism from his column in the Sunday Times. Praise for Jeremy Clarkson: 'Brilliant . . . laugh-out-loud' Daily Telegraph 'Outrageously funny . . . will have you in stitches' Time Out Number-one bestseller Jeremy Clarkson writes on cars, current affairs and anything else that annoys him in his sharp and funny collections. Born To Be Riled, Clarkson On Cars, Don't Stop Me Now, Driven To Distraction, Motorworld, and I Know You Got Soul are also available as Penguin paperbacks; the Penguin App iClarkson: The Book of Cars can be downloaded on the App Store. This book examines the dramatic increase in automotive assembly plants in the former Socialist Central European (CE) nations of

Czechia, East Germany, Hungary, Poland, and Slovakia from 1989 onwards. Enticed by relatively lower-wage labour and significant government incentives, the world's largest automakers have launched more than 20 passenger car assembly complexes in CE nations, with production accelerating dramatically since 2001. As a result, the annual passenger car production in Western Europe declined by more than 20% between 2001 and 2015, and alternatively in the CEE it increased by nearly 170% during this period. Drawing on case studies of 25 current and former foreign-run assembly plants, the author presents a rare historical account of automotive foreign assembly plants in the CE following this dramatic geographic shift. This book will expand the knowledge of policy-makers in Europe in relation to their pursuits of FDI and will be of great interest to scholars and students of business, economic history, political science, and development.

This book chronicles the divergent growth trends in car production in Belgium and Spain. It delves into how European integration, high wages, and the demise of GM and Ford led to plant closings in Belgium. Next, it investigates how lower wages and the expansion strategies of Western European automakers stimulated expansion in the Spanish auto industry. Finally, it offers three alternate scenarios regarding how further EU expansion and Brexit may potentially reshape the geographic footprint of European car production over the next ten years. In sum, this book utilizes history to help expand the knowledge of scholars and policymakers regarding how European integration and Brexit may impact future auto industry investment for all EU nations.
