This book chronicles the divergent growth trends in car production in Belgium and Spain. It delves into how European integration, high wages, and the demise of GM and Ford led to plant closings in Belgium. Next, it investigates how lower wages and the expansion strategies of Western European automakers stimulated expansion in the Spanish auto industry. Finally, it offers three alternate scenarios regarding how further EU expansion and Brexit may potentially reshape the geographic footprint of European car production over the next ten years. In sum, this book utilizes history to help expand the knowledge of scholars and policymakers regarding how European integration and Brexit may impact future auto industry investment for all EU nations.

In this story of an astonishing love, Thomas Sanchez portrays the violence, hope, and grandeur of lives transformed by war and exile. At the heart of the novel are Zermano, a world-famous Spanish painter, and his beautiful French muse, Louise Collard -- whose lives are torn apart by the German invasion of France in World War II. Leaving Louise in Vichy-controlled Provence, Zermano returns to occupied Paris. But while he eventually goes on to celebrity and fortune, Louise disappears into obscurity. Fifty years later, after Louise's death, an American scholar arrives in the south of France seeking the truth about the lovers' tempestuous romance and sudden separation. Why did the painter abandon the young beauty? What was the cause of her lifelong reclusiveness? What dark mysteries were being concealed by the ill-fated couple? By chance, the professor finds a cache of correspondence -- Zermano's letters to Louise in her remote mountain village, and her intentionally unmailed letters to him in Paris. In their vivid, wrenching contents he uncovers secrets that Louise kept even from Zermano about her wartime experience: the dangers of her participation in the Resistance, and her complicity with one of its leaders, the Fly; her struggles to elude a sadistic officer who hunts her for political and personal reasons; her lyrical intimacy with a mystical beekeeper. Louise is forced to make a fateful decision between the love for her man, and the ultimate sacrifice for her country. In a powerful climax, the scholar is compelled to journey to Mallorca, where Zermano is rumored to be living in self-imposed exile. Determined to reveal Louise's fate to the painter, our narrator does not suspect that he, too, will be forced to confront the enigma of his own desire.

Since the beginning of times man always had a deep longing to know the future. As God forbids fortune telling, he nevertheless sends prophets to prepare his people. One of the prophets in the twentieth century was a Pentecostal Pastor called William Branham. In 1933 he received seven prophetic visions on end time events. In the fourth vision he saw cars running automatically on American highways. Cars had no steering wheel and the front passengers were turned backwards playing some kind of game. The roof was completely transparent and cars were egg shaped. This prophecy is now in the process of being fulfilled. In 1997 a dozen of cars moved automatically on a Californian highway. The technology is now present to help establish these highways. Science will soon accomplish what God foretold. This book explains scientifically how and when science will fulfill this prophecy in the twenty first century. For more information contact Edwin Standley: Edwin.Standley@gmail.com Leonidas Muganda and Edwin Standley are Pastor and Engineer in Electronics respectively. They met for the first time at Hull University in England during their studies. Leonidas is married to Francoise and has three sons. He lives in Leicester and is a leader in his church. He has a passion for the word of God that he knows from Genesis to Revelation. Edwin lives in France, and is interested in science and especially automated cars. He read about the ministry and prophecies of a Pastor called William Branham. Leonidas and Edwin decided it was time to write a book explaining how the establishment of automated highways will fulfill what William Branham predicted in his prophecies a long time ago.

Francophiles and Paris buffs will find something new and fascinating in this timeless guidebook, filed with sites, passageways, hotels, shops, and more What if—walking around Paris—instead of seeing only the Paris of 2017, you glimpsed Paris in Revolutionary times? Or Paris when it was home to 80,000 horses; or Paris lit by gaslight; or medieval Paris? What if—walking down a block in Paris—you recognized the signs, mosaics, pieces of hardware, and architectural details as relics of many centuries that have stories to tell of past eras? This is what Curiosities of Paris reveals. Each of the book’s 800 photos of unique locations and architectural oddities—as well as utilitarian objects whose functions have long been obscured with the passage of time—discloses a previously unnoticed city. Even those who know Paris well might never have registered the thousands of details on every street that testify to the enduring presence of the past: the solar cannon at Invalides, street signs with the word “saint” and all fleur-de-lys removed; the unique features of Parisian street lighting. You’ll never look at an elm tree the same way again. And, with Curiosities of Paris as your guide, you’ll feel very in-the-know as you walk down the Champs-Élysées past all the auto dealerships. Organized by subject—including fountains and wells; centuries-old shop signs; vestiges of wars and ancient Egypt; hotels of legend; remarkable trees; sundials and meridians; equestrian Paris; romantic ruins; unusual tombs, stairways, and passageways; religious relics; mosaics; public barometers and thermometers; and hundreds more urban elements and anachronisms—the book also includes three themed walks (along the city’s ancient walls, in the steps of Quasimodo, and through the French Revolution), as well as an index of street names. This absorbing compendium is an essential addition to the library of the armchair traveler and flâneur alike.

Together with his colleagues at Citroën, André Lefebvre created the Traction Avant (1934), the TUB (1939) – Citroën's first front wheel drive utility van that was succeeded by the H and HY vans (1947) – the Deux Chevaux (1948), and, last but not least, the DS (1955). From 1923 to 1931 Lefebvre also designed several highly original and outstanding competition cars and record-breaking automobiles for Voisin. He even drove some these cars in races and record attempts. It is obvious that during his 16 years with Gabriel Voisin he was very much influenced by the ideas of this illustrious aviation pioneer and car manufacturer. The experience gained during that period gave him the self-confidence to persuade his successive bosses at Citroën that his unorthodox approach to automobile design was what the company needed; first he convinced André Citroën, later Pierre Michelin, then Pierre-Jules

Boulanger, and finally Robert Puiseux and Pierre Bercot. His oeuvre for Citroën alone earns him a place of honour among the great automobile designers of the past century. The fact that most present-day cars still carry the DNA of his design philosophy makes him stand out above other automotive pioneers and innovators. That is why it is amazing that so little is known about this fascinating and brilliant engineer. This book was written in order to remedy that, and to pay tribute to André Lefebvre: the passionate pioneer who left car enthusiasts around the world such an important heritage.
