Caterhams are a new take on the classic Lotus Sevens and are found on racetracks and twisty roads around the world. Caterham Sevens is the story of a former Lotus dealer, Graham Nearn, who saw the potential of a hand-built sportscar which its creator, Lotus founder Colin Chapman, was about to discard. Nearn bought manufacturing rights from Colin Chapman, and by developing ever more powerful versions for more than 30 years, turned Caterham into one of the world's most prolific and affordable sports-racing cars. Widely recognized as the standard work on the history of Caterham and its cars from the original Lotus Seven of 1957 and its Caterham derivative of 1973 to the latest Cosworth-powered Caterham CSR of 2005. As solid and dependable as the man himself, Dad's car was often almost a member of the family, whisking you to exciting days out, or just to visit relatives to the chant of "Are we there yet?" Maybe in an idle moment Dad dreamed of driving something fast, but the demands of family life meant hard tops and firm suspension--anything less than four doors would have been wildly hedonistic. Even though the family car may not have been the very essence of rock 'n' roll, Dad was proud of it. Spanning the 1950s to the 1980s, this is a celebration of the heyday of the Dad car. From beloved family workhorses like the Ford Cortina and Vauxhall Viva to the rakish excitement of the Rover 3500 and Citroen CX, 60 of the best-known and best-loved family cars of all time are organized into categories such as Sporty Dad, Frugal Dad, and Compact Dad, with an affectionate and witty article dedicated to each car. Reflecting on a time

when the nearest thing to an airbag was hiding behind your brother, this is a celebration of cars that were as flawed and as loveable as Dad himself. White and Yellow Pages W G Nichols Pub

The Car Hacker's Handbook Random House
This is the first significant publication to explore the output of Matt Keegan, the New York-based artist known for his work across mediums, as well as independent publishing including the acclaimed editioned art journal North Drive Press. This

monograph expands on a recent solo exhibition by the artist at Rogaland Kunstsenter; Stavanger, Norway, titled "Portable Document Format." The show was organized as an idiosyncratic retrospective, with Keegan remaking sculptures dating from 2006 to 2015, initially fabricated in Sheetrock and steel, in cardboard. Like the exhibition, the publication serves both as a project and a reference for the artist's work. Essays by Tom McDonough and John Miller theorize Keegan's production, while interviews with Sara VanDerBeek and Anna Craycroft underscore the artist's ongoing engagement with his peer group. Furthered by contributions from colleagues Uri Aran, Leslie Hewitt and James Richards, situated alongside full-color installation photos and reproductions of work from the past decade, Matt Keegan: OR provides a solid introduction and layered overview of the artist's multifarious practice.
