The Goddess--La D é esse Haynes Service and Repair Manuals
In this new view of the Citroen story, automotive/aviation writer and design specialist Lance Cole investigates not just the details of the cars of Citroen, but the aeronautical and cultural origins that lay behind Citroen's form and function. The book digs deep into the ethos of Automobiles Citroen to create a narrative on one of the greatest car manufacturers in history. Using interviews, translations, archive documents and specially-commissioned photographs, the Citroen journey is cast in a fresh perspective. It explains in detail the influences upon Citroen design: Voisin, Lefebvre, Bertoni, Boulanger, Mages, Opron and recent Citroen designers such as Coco, Blakeslee and Soubirou. As well as all the men of the great period of 1920s-1970s expansion, it also cites less well-known names of Citroen's French engineering, design, and influence such as Cayla, Gerin, Giret, Harmand, Dargent and others, to give a full picture of Citroen heritage. The book provides in-depth analysis of all major Citroen models with an engineering and design focus and profiles key individuals and cars up to the present day and Citroen's 'DS'-branded resurgence. It features many newly commissioned photographs, rare archive drawings and interviews with Citroen owners. Researched amongst leading Citroen experts and restorers, Lance Cole provides a fresh perspective on the Citroen car manufacturer, its design language and the legacy of its extraordinary engineering which will be of great interest to all Citroen and motoring enthusiasts. Superbly illustrated with 329 colour photographs, many newly commissioned along with rare archive drawings.

The Car Hacker's Handbook Crowood

From the internationally bestselling author and prizewinning economist--a highly original guide to the global economy. In his bestselling 23 Things They Don't Tell You About Capitalism, Cambridge economist Ha-Joon Chang brilliantly debunked many of the predominant myths of neoclassical economics. Now, in an entertaining and accessible primer, he explains how the global economy actually works--in real-world terms. Writing with irreverent wit, a deep knowledge of history, and a disregard for conventional economic pieties, Chang offers insights that will never be found in the textbooks. Unlike many economists, who present only one view of their discipline, Chang introduces a wide range of economic theories, from classical to Keynesian, revealing how each has its strengths and weaknesses, and why there is no one way to explain economic behavior. Instead, by ignoring the received wisdom and exposing the myriad forces that shape our financial world, Chang gives us the tools we need to understand our increasingly global and interconnected world often driven by economics. From the future of the Euro, inequality in China, or the condition of the American manufacturing industry here in the United States--Economics: The User's Guide is a concise and expertly crafted guide to economic fundamentals that offers a clear and accurate picture of the global economy and how and why it affects our daily lives.

How to Power Tune Rover V8 Engines for Road & Track Veloce Publishing Ltd

In this readable and informative book, motoring expert Malcolm Bobbit tells the story of one of the most iconic cars in motoring history. Designed as affordable and practical transport for French farmers traveling on either bad roads or plowed fields, it also found its way into the fashionable quarters of Paris. The book shows how designers successfully achieved the specification for rugged and utilitarian design suitable for times of austerity

while at the same time producing a truly classless car. The author explains the history of the car, conceived when Citroen was owned by the Michelin tire company, and how the idea evolved. He covers the ingenious design aspects of the car, including the corrugated metal bonnet, hammock seats, push-pull gear lever, and twin-cylinder air-cooled engine. Such was the success of the 2CV that it spawned variants such as the Dyane, Ami 6 and Ami 8, and the British-built Bijou, all of which are covered in the book. Illustrated with a unique collection of high-quality photographs and written by an authority on Citroen cars, this concise book tells you all you need to know about the famous 2CV.
