How could one company—General Motors—meet disaster on one continent and achieve explosive growth on another at the very same time? While General Motors was hurtling towards bankruptcy in 2009, GM's subsidiary in China was

setting new sales and profit records. This book reveals how extraordinary people, remarkable decisions and surprising breaks made triumph in China possible for General Motors. It also shows just how vulnerable that winning track record remains. No small part of GM's success in China springs from its management of shifting business and political relationships. In China, the government makes the rules for—and competes in—the auto industry. GM's business partner, the City of Shanghai, is both an ally and a competitor. How does such an unnatural relationship work on a day-to-day basis? Where will it go on the future? General Motors also engages in constant battles with other global and Chinese car makers for the hearts of demanding Chinese consumers. Dunne gives us rare glimpses into the mindsets and behavior of this new moneyed set, the worlds newest class of wealthy

consumers. China is already the number one car market in the world. During the next ten years, China will export millions of cars and trucks globally, including to the United States. American Wheels, Chinese Roads presents readers with fascinating illustrations of what to expect when Chinese cars, companies, and business people arrive on our shores.

From award-winning writer David Mitchell comes a sinewy, meditative novel of boyhood on the cusp of adulthood and the old on the cusp of the new. *Black Swan Green* tracks a single year in what is, for thirteen-year-old Jason Taylor, the sleepest village in muddiest Worcestershire in a dying Cold War England, 1982. But the thirteen chapters, each a short story in its own right, create an exquisitely observed world that is anything but sleepy. A world of Kissingeresque realpolitik enacted in boys' games on a frozen lake; of “nightcreeping” through the summer backyards of strangers; of the tabloid-fueled thrills of the Falklands War and its human toll; of the cruel, luscious Dawn Madden and her power-hungry boyfriend, Ross Wilcox; of a certain Madame Eva van Outryve de Crommelynck, an elderly bohemian emigré who is both more and less than she appears; of Jason's search to replace his dead grandfather's irreplaceable smashed watch before the crime is discovered; of first cigarettes, first kisses, first Duran Duran LPs, and first deaths; of Margaret Thatcher's recession; of Gypsies camping in the woods and the hysteria they inspire; and, even closer to home, of a slow-

motion divorce in four seasons. Pointed, funny, profound, left-field, elegiac, and painted with the stuff of life, *Black Swan Green* is David Mitchell's subtlest and most effective achievement to date. Praise for *Black Swan Green* "[David Mitchell has created] one of the most endearing, smart, and funny young narrators ever to rise up from the pages of a novel. . . . The always fresh and brilliant writing will carry readers back to their own childhoods. . . . This enchanting novel makes us remember exactly what it was like."—The Boston Globe "[David Mitchell is a] prodigiously daring and imaginative young writer. . . . As in the works of Thomas Pynchon and

Herman Melville, one feels the roof of the narrative lifted off and oneself in thrall."—Time

Japanese foreign direct investment has played a leading role in Asian economies for more than two decades. This book, describing the changing industrial dynamics after the Asian currency crisis in 1997, focuses on corporate strategies of Japanese automobile and electronics

companies in Asian nations, with detailed analysis of management issues and strategies from the viewpoint of both the home economy and the recipient host economies. Among the cases presented are the global restructuring of the Korean automobile industry and the transfer of automotive technology to China via Taiwan. Other studies, from the electronics industry, look at production sites in Malaysia, backward integration in Singapore, and forward integration in Hong Kong. The contributions of specialists from Asia, Europe, and the United States collected here envision an ongoing process of globalization and provide valuable perspective and background for business management and East Asian studies.

Despite the regional currency crisis of 1997-1998, Asia-Pacific economies continue to be among the most attractive markets in the world.

Although Japanese and American firms have invested heavily in the past decades, European firms are poised to take advantage of the post-Asian recovery, phenomenal Chinese growth rates, and

deepening economic liberalization. This volume focuses on understanding the market and nonmarket strategies employed by European firms to boost their share of the Asian market and to rally European governments and the European Union in support of their initiatives. In addition to a novel theoretical framework to analyze strategy, three chapters focus on investment trends in Asia, lobbying in Asia and the EU, the book includes original case studies of the air transport, automobile, software, and finance sectors.

Six months after its American introduction in 1985, the Yugo was a punch line; within a year, it was a staple of late-night comedy. By 2000,

NPR's Car Talk declared it "the worst car of the millennium." And for most Americans that's where the story begins and ends. Hardly. The short, unhappy life of the car, the men who built it, the men who imported it, and the decade that embraced and discarded it is rollicking and astounding, and one of the greatest untold business-cum-morality tales of the 1980s. Mix one rabid entrepreneur, several thousand "good" communists, a willing U.S. State Department, the shortsighted Detroit auto industry, and improvident bankers, shake vigorously, and you've got The Yugo: The Rise and Fall of the Worst Car in History. Brilliantly re-creating the amazing confluence of events that produced the Yugo, Yugoslav expert Jason Vuic uproariously tells the story of the car that became an international joke: The American CEO who happens upon a Yugo right when his company needs to find a new import or go under. A State Department eager to

the aid Yugoslavia's nonaligned communist government. Zastava Automobiles, which overhauls its factory to produce an American-ready Yugo in six months. And a hole left by Detroit in the cheap subcompact market that creates a race to the bottom that leaves the Yugo . . . at the bottom.
