This book offers glimpses into the personal and scholarly lives of 20 giants in the history of psychology. As in the earlier volumes, prominent scholars were invited to prepare chapters on a pioneer who had made important contributions in their own area of expertise. Some of the psychologists described may be the teachers of the instructors who will be the users of this book, potentially providing a personal connection of the pioneers to the students. A special section provides brief portraits of the editors and authors, containing interesting information about the relationship between the pioneers and the psychologists who describe them. Utilizing an informal, personal, sometimes humorous, style of writing, the book will

appeal to students and instructors interested in the history of psychology. Each of the five volumes in this series contains different profiles thereby bringing more than 100 of the pioneers in psychology more vividly to life.

Many technical obstacles to effective innovation no longer exist: today, companies possess global networks that can connect with knowledge from virtually any source. Today's challenge is to collaboratively transform that knowledge into higher-value innovation. Their book introduces groundbreaking strategies and models for consistently achieving this goal. Authors Alpheus Bingham and Dwayne Spradlin draw on their own experience building InnoCentive, the pioneering global platform for open innovation (a.k.a. "crowdsourcing").

Writing for business executives, R&D leaders, and innovation strategists, Bingham and Spradlin demonstrate how to dramatically increase the flow of high-value ideas and innovative solutions both within enterprises and beyond their boundaries. They show: Why open innovation works so well. How to use open innovation to become more agile and entrepreneurial. How to access Idea Markets more quickly, and get more value from them. How to overcome new forms of "Not Invented Here" syndrome. How to implement cultural, organizational, and management changes that lead to greater innovation. New trends in open innovation—and the opportunities they present. The authors present many new open innovation case studies, from P&G and Eli Lilly to NASA and the City of Chicago.

Contrary to popular belief, leadership is not the solution to every business problem or sustained business success. The answer lies in the culture of the organization. Strong business leaders follow their organization's culture and guide with a system of beliefs called Cultureship. Business managers who practice Cultureship know that developing and leading high-performing cultures can be learned and taught. Backed with irrefutable evidence, Cultureship introduces this system of beliefs and illustrates how changing culture can quickly lead to better business results; how every employee wants to grow, serve, and perform; how associates ultimately own the culture; and how successful leaders don't tell, they lead. Once you understand each of the ten beliefs and how they fit together as a unified whole, you will be on

your way to becoming a great leader. Applying Cultureship to your own business, whether you're a novice or a more experienced manager, will differentiate your organization, increase productivity, lead to higher profits, and elevate you to a more advanced level of personal leadership success.

In the United States, people of color are disproportionately more likely to live in environments with poor air quality, in close proximity to toxic waste, and in locations more vulnerable to climate change and extreme weather events. In many vulnerable neighborhoods, structural racism and classism prevent residents from having a seat at the table when decisions are made about their

community. In an effort to overcome power imbalances and ensure local knowledge informs decision-making, a new approach to community engagement is essential. In *Resilience for All*, Barbara Brown Wilson looks at less conventional, but often more effective methods to make communities more resilient. She takes an in-depth look at what equitable, positive change through community-driven design looks like in four communities—East Biloxi, Mississippi; the Lower East Side of Manhattan; the Denby neighborhood in Detroit, Michigan; and the Cully neighborhood in Portland, Oregon. These vulnerable communities have prevailed in spite of serious urban stressors such as climate change, gentrification, and disinvestment. Wilson looks at how the lessons in the case studies and other examples might more broadly inform future practice. She shows

how community-driven design projects in underserved neighborhoods can not only change the built world, but also provide opportunities for residents to build their own capacities.

"Men who inherit great wealth are respected, but women who do the same are ridiculed. In *The Silver Swan*, Sallie Bingham rescues Doris Duke from this gendered prison and shows us just how brave, rebellious, and creative this unique woman really was, and how her generosity benefits us to this day." —Gloria Steinem
A bold portrait of Doris Duke, the defiant

and notorious tobacco heiress who was perhaps the greatest modern woman philanthropist In *The Silver Swan*, Sallie Bingham chronicles one of the great underexplored lives of the twentieth century and the very archetype of the modern woman. “ Don ’ t touch that girl, she ’ ll burn your fingers, ” FBI director J. Edgar Hoover once said about Doris Duke, the inheritor of James Buchanan Duke ’ s billion-dollar tobacco fortune. During her lifetime, she would be blamed for scorching many, including her mother and various ex-lovers. She established her first foundation when she was twenty-one; cultivated friendships with the likes of Jackie Kennedy, Imelda Marcos, and Michael Jackson; flaunted interracial relationships; and

adopted a thirty-two year-old woman she believed to be the reincarnation of her deceased daughter. This is also the story of the great houses she inhabited, including the classically proportioned limestone mansion on Fifth Avenue, the sprawling Duke Farms in New Jersey, the Gilded Age mansion Rough Point in Newport, Shangri La in Honolulu, and Falcon ’ s Lair overlooking Beverly Hills. Even though Duke was the subject of constant scrutiny, little beyond the tabloid accounts of her behavior has been publicly known. In 2012, when eight hundred linear feet of her personal papers were made available, Sallie Bingham set out to probe her identity. She found an alluring woman whose life was forged in the Jazz Age, who was not only an early war

correspondent but also an environmentalist, a surfer, a collector of Islamic art, a savvy businesswoman who tripled her father's fortune, and a major philanthropist with wide-ranging passions from dance to historic preservation to human rights. In *The Silver Swan*, Bingham is especially interested in dissecting the stereotypes that have defined Duke's story while also confronting the disturbing questions that cleave to her legacy.
