This bibliography has been compiled as a companion volume to the Bibliography on Land Settlement issued in 1934 by the United States Department of Agriculture as Miscellaneous Publication 172. It contains selected references to the literature on the economic aspects of land utilization and land policy in the United States and in foreign countries, published for the most part during the period 1918-36.

Cumulative List of Organizations Described in Section 170 (c) of the Internal Revenue Code of 1954

Springer Science & Business Media
t ê te-b ê che Book. One half depicts the mega city problems, but when the book is flipped over, the other half provides the garden city solutions. Packed with photographs, diagrams, and colourful info-graphics, Garden City Mega City presents a compelling case for re-examining and re-planning the mega cities of the 21st century.

This volume analyzes the politics of hazardous waste siting and explores promising new strategies for siting facilities. Existing approaches to waste siting facilities have almost entirely failed, across all industrialized countries, largely because of community or NIMBY (Not in My Backyard) opposition. This volume

examines a new strategy, voluntary choice siting--a process requiring mutual decisions negotiated between facility developers and the host communities. This bottom-up approach preserves democratic rights, recognizes the importance of public perceptions, and addresses issues of equity. In this collection, an interdisciplinary group of experts probes recent examples of waste facilities siting in the United States, Canada, Germany, and Japan. Both the successes and the failures presented offer practical insights into the siting process. The book includes an introductory review of the literature on facility siting and the NIMBY phenomenon as well as instructive essays on the use of voluntary processes in facilities siting. This book will be of value to policymakers, industry, and environmental groups, as well as to those working in environmental studies and engineering, political science, public health, geography, planning, and business economics.
Serial set (no.5800-6599)

In 1905 Roosevelt challenged the brilliant and famous sculptor Augustus Saint-Gaudens: The United States is the best nation on Earth, but its coins are atrociously hideous. Why can we not produce coinage as beautiful as that of the ancient Greeks?
