collections of papers according to subject.
Framing a Lost City Irwin/McGraw-Hill
Many technical obstacles to effective
innovation no longer exist: today,
companies possess global networks that can
connect with knowledge from virtually any
source. Today ' s challenge is to
collaboratively transform that knowledge

into higher-value innovation. Their book
introduces groundbreaking strategies and
models for consistently achieving this goal.
Authors Alpheus Bingham and Dwayne
Spradlin draw on their own experience
building InnoCentive, the pioneering global
platform for open innovation (a.k.a.
"crowdsourcing"). Writing for business
executives, R&D leaders, and innovation
strategists, Bingham and Spradlin
demonstrate how to dramatically increase
the flow of high-value ideas and innovative
solutions both within enterprises and
beyond their boundaries. They show: Why
open innovation works so well. How to use
open innovation to become more agile and
entrepreneurial. How to access Idea
Markets more quickly, and get more value

from them. How to overcome new forms of
"Not Invented Here" syndrome. How to
implement cultural, organizational, and
management changes that lead to greater
innovation. New trends in open
innovation – and the opportunities they
present. The authors present many new
open innovation case studies, from P&G
and Eli Lilly to NASA and the City of
Chicago.

One day in March 1987, a barge
from Islip, Long Island was
evicted from Morehead City,
North Carolina, after trying to
unload the mountains of trash
on its decks. More than five
months from the time it began
its trip, the unwelcome barge,

and it's 3,186 tons of commercial garbage, became the cornerstone of an astonishing news investigation that revealed a country unable to cope with its mounting garbage crisis. Newsday reporters were the first to locate the barge, the Mobro 4000 as it drifted aimlessly off the shore of Long Island. They were also first to explore and explain the problems and issues that barge had come to symbolize. The results of their investigation are presented in this book. Winner of the Worth Bingham Award, the Page One Award for Crusading Journalism, and the New York State Associated Press Award for In-Depth Reporting, Rush to Burn explains the reasons why we, as a throw-away society, are suffocating in our own trash. It also explains why communities, in desperation, are turning to incineration, the riskiest form of garbage disposal yet developed. Transactions University of Texas Press

An “engaging” study of Machu Picchu’s transformation from ruin to World Heritage site, and the role a National Geographic photo feature played (Latin American Research Review). When Hiram Bingham, a historian from Yale University, first saw Machu Picchu in 1911, it was a ruin obscured by overgrowth whose terraces were farmed by a few families. A century later, Machu Picchu is a UNESCO World Heritage site visited by more than a million tourists annually. This remarkable transformation began with the photographs that accompanied Bingham’s article were published in National Geographic magazine, which depicted Machu Picchu as a lost city discovered. Focusing on the practices, technologies, and materializations of Bingham’s three expeditions to Peru in the first decade of the twentieth century, this book makes a convincing case that visualization, particularly through the camera, played a decisive role in positioning Machu Picchu as both a scientific discovery and a Peruvian heritage site. Amy Cox Hall argues that while Bingham’s expeditions relied on the labor, knowledge, and support of Peruvian elites, intellectuals, and peasants, the practice of scientific witnessing, and

photography specifically, converted Machu Picchu into a cultural artifact fashioned from a distinct way of seeing. Drawing on science and technology studies, she situates letter writing, artifact collecting, and photography as important expeditionary practices that helped shape the way we understand Machu Picchu today. Cox Hall also demonstrates that the photographic evidence was unstable, and, as images circulated worldwide, the “lost city” took on different meanings—especially in Peru, which came to view the site as one of national patrimony in need of protection from expeditions such as Bingham’s.

Utah Springer

The way we think about money has extraordinary impact. This book satisfies the growing longing for a financial overview that can provide practical advice and demonstrate how money is a social tool. Making Money Matter introduces the reader to common money mistakes, and the dysfunctional nature of the current financial framework. Its overview of the SRI world will inspire investors to push their advisors’ envelope while providing new strategies to meet the demand for positive

impact. It provides a philosophical basis for transforming our view of money from an end unto itself to a means to change the world for the better. This book traces the author's journey from early financial innocence to an appreciation of how money works and how it can be transformed. People who care about the planet and society at large need a bridge from deeply felt values to practical understanding and advice that will lead to a new money paradigm. This new approach covers all aspects of money from everyday transactions to high impact investment options. It describes a new investment paradigm that will support both reasonable returns and long-term societal and planetary health. Socially Responsible Investing (SRI) is well established for smaller scale investors in the public space and impact investing for accredited and qualified investors is taking hold in the private-space. Readers want more than flat definitions, and need an inclusive overview that can inspire investors on all levels to move the trillions required for addressing the world's many dire problems. This book's unique contribution is a personal, practical and

holistic approach to socially conscious investing, which engages the reader in a way that is both healing and empowering. *Making Money Matter* is designed for mass appeal. First, its biographical, true-confessions format introduces the reader to common money mistakes made by the author, while personalizing the dysfunctional nature of the current financial framework. Secondly, its personalized overview of the countermovement of socially-conscious investment options is designed to inspire investors to push their advisors' advice-envelope while providing investment managers with practical new strategies to meet the burgeoning demand for positive impact. Finally, this book provides a philosophical basis for the new money paradigm that shows how to transform our view of money from an end unto itself to a means to change the world for the better. This book is aimed at people who are concerned about Wall Street, banking and our current monetary and finance system, average investors, businessmen, progressives, libertarians or fiscal conservatives. However it should be of particular interest to investment

professionals looking for new ways of meeting their clients' needs. Investment managers and consultants need to be educated about this space. This book should be as popular among family office associations as the Chartered Financial Analysts Association. But this book's ultimate goal is to provide inspiration to all levels of investors. Everyone uses money, and the way we think about money has more impact than all the impact investments put together. This thinking needs to change. Just as consumers drove the growth of the local and organic movements, investors will drive the new money paradigm. This may help anyone to begin to think about the real bottom line of every transaction, which is the impact of our actions on the planet - including all living beings that inhabit it. *Mineral Facts and Problems* Taylor & Francis This textbook provides comprehensive coverage of accounting and financial reporting for all levels of government and not-for-profit organizations, as well as governmental auditing and performance measurement. This fifteenth edition offers two Web-accessible computerized cumulative problems; has been revised to reflect contemporary guidance from the GASB, FASB, FASAB, GAO, OMB,

AICPA, and IRS; features new questions, cases, exercises, and problems; and includes expanded coverage of post-employment benefits, major fund reporting, investments and derivatives, IRS Form 990, and budgeting and performance management.

Professional Paper MIT Press

Innovation has become an important focus for governments around the world over the last decade, with greater pressure on governments to do more with less, and expanding community expectations. Some are now calling this ‘social innovation’ – innovation that is related to creating new services that have value for stakeholders (such as citizens) in terms of the social and political outcomes they produce. *Innovation in City Governments: Structures, Networks, and Leadership* establishes an analytical framework of innovation capacity based on three dimensions: Structure - national governance and traditions, the local socioeconomic context, and the municipal structure Networks – interpersonal connections inside and outside the organization Leadership – the qualities and capabilities of senior individuals within the organization. Each of these are analysed using data from a comparative EU research project in Copenhagen, Barcelona and Rotterdam. The book provides major new insights on how

structures, networks and leadership in city governments shape the social innovation capacity of cities. It provides ground-breaking analyses of how governance structures and local socio-economic challenges, are related to the innovations introduced by these cities. The volume maps and analyses the social networks of the three cities and examines boundary spanning within and outside of the cities. It also examines what leadership qualities are important for innovation. *Innovation in City Governments: Structures, Networks, and Leadership* combines an original analytical approach with comparative empirical work, to generate a novel perspective on the social innovation capacity of cities and is critical reading for academics, students and policy makers alike in the fields of Public Management, Public Administration, Local Government, Policy, Innovation and Leadership.

Journal of the Board of Supervisors of the County of Onondaga Island Press

This volume provides case studies about successful strategies employed in diverse world areas for the protection of archaeological heritage resources. Some chapters focus on a search for solutions arrived at by diverse groups of people working in specific areas rather than simply describing

loss of cultural heritage. Other chapters provide a long-term view of intensified efforts at protection of archaeological resources. The authors describe challenges and solutions derived by concerned people in eastern Asia (China, Japan, Thailand), West Africa, Easter Island, Jordan, Honduras and more than one area of Peru. All of the authors draw upon deep, personal involvement with the protection of cultural heritage in each area. This volume is a timely addition to a growing number of conferences and publications about the management of cultural heritage—both archaeological and historical.

How leaders can recast innovation’s toughest trade-offs—efficiency vs. flexibility, consistency vs. change, product vs purpose—as productive tensions. Why is leading innovation in today’s dynamic business environment so distressingly hit-or-miss? More than 90 percent of high-potential ventures don’t reach their projected targets. Surveys show that 80 percent of executives consider innovation crucial to their growth strategy, but only 6 percent are satisfied with their innovation performance. Should leaders aim for Steve Jobs-level genius, shower their projects with resources, or lean in

to luck and embrace uncertainty? None of the above, say Christopher Bingham and Rory McDonald. Drawing on cutting-edge research and probing interviews with hundreds of leaders across three continents, in *Productive Tensions* Bingham and McDonald find that the most effective leaders and successful innovators embrace the tensions that arise from competing aims: efficiency or flexibility? consistency or change? product or purpose? Bingham and McDonald spotlight eight critical tensions that every innovator must master, and they spell out, with dozens of detailed examples of both success and failure, how to navigate them. How do you excite customers about a product they've never imagined? When is it wise to accept what the data is telling you, and when should you ignore the data and plow forward anyway? How can you maintain stakeholders' trust and support during radical unforeseen course corrections? Bingham and McDonald guide readers through innovation's thorniest tensions, using examples drawn from the experience of organizations as varied as P&G, Instagram, the US military, Honda, In-N-Out Burger, Slack, Under Armour, and the snowboarding company Burton.
