Classic Books Library presents this brand new edition of "The Federalist Papers", a collection of separate essays and articles compiled in 1788 by Alexander Hamilton. Following the United States Declaration of Independence in 1776, the governing doctrines and policies of the States lacked cohesion. "The Federalist", as it was previously known, was constructed by American statesman Alexander Hamilton, and was intended to catalyze the ratification of the United States Constitution. Hamilton recruited fellow statesmen James Madison Jr., and John Jay to write papers for the compendium, and the three are known as some of the Founding Fathers of the United States. Alexander Hamilton (c. 1755–1804) was an American lawyer, journalist and highly influential government official. He also served as a Senior Officer in the Army between 1799-1800 and founded the Federalist Party, the system that governed the nation's finances. His contributions to the Constitution and leadership made a significant and lasting impact on the early development of the nation of the United States.

Sound democratic decisions rely on a citizenry with at least a partial mastery of the rules and workings of democratic government. American high schools, where students learn the basics of citizenship, thus ought to play a critical role in the success of democracy. Yet studies examining the impact of high school government and civics courses on political knowledge over the past quarter-century have generally shown that these courses have little or no effect. In this important book, Richard G. Niemi and Jane Junn take a fresh look at what America's high school seniors know about government and politics and how they learn it. The authors argue convincingly that secondary school civics courses do indeed enhance students' civic knowledge. This book is based on the most extensive assessment to date of civic knowledge among American youth--the 1988 National Assessment of Education Progress (NAEP) Civics Assessment. The authors develop and test a theoretical model to explain the cognitive process by which students learn about politics and they conclude by suggesting specific changes in the style and emphasis of civics teaching.

The achievement, schooling, and the ethnic identities of Asian American students are among the core areas in the field of Asian American education, yet there is much that remains to be uncovered, verified, contradicted, and learned through sound research, especially as the Asian American population rapidly increases in size and in the diversification of its characteristics. The chapters in this book deal present cutting-edge work in these three areas and contain innovative perspectives, new qualitative quantitative data, and discussions of the implications of findings for educational policies,

practices, and programs. These chapters cover such specific topics as academic achievement gaps between Asian American and White students, contemporary school experiences of Southeast Asians and of undocumented Asian American students, perspectives on teaching immigrant and refugee students, and the development of ethnic identities. This work is authored by well-known higher education faculty as well as emerging scholars. Overall, this material represents a valuable, timely, and useful contribution to the literature on Asian Americans that will be of interest to faculty, administrators, policymakers, researchers, and students.

Founding documents—namely, the 1916 Report on Social Studies—is the focus of John Dewey and the Dawn of Social Studies: Unraveling Conflicting Interpretations of the 1916 Report which examines the Report in order to determine how it has been interpreted and regarded over time. The underlying question involved is: "Which interpretation, or interpretations, most embodies the intent, goals, and purpose of the 1916 Committee?" Key members of the 1916 committee have been identified for extended research and analysis. One additional individual frequently quoted throughout the Report, John Dewey, received special consideration owing to his stature and influence in the U.S. and throughout the world. The wide variety of interpretations was examined within an organizational framework utilized to discuss and analyze the broad spectrum of interpretations that exist. This examination encompassed the existing theories, the meaning and intent of the 1916 committee, as well as the social and political aspects of the era. The overarching intent of founding documents, in this case the 1916 Report, is to make sense of the various scholarly interpretations and offer insights as to whether or not a consensus of opinion among scholars existed. Like all important founding documents whose authors have long since passed through the veil of history, but whose work continues to influence, we, as scholars, social studies and history educators, and curriculum and instruction researchers, want to know whose ideas are at the forefront of social studies—one of the most contested academic fields of study in America.

This supplemental text is an historical account of the beginning years of the social studies. Using the 1916 Social Studies report as a base, the book outlines the issues, contexts, and individuals that were influential in the genesis of the seminal social studies prototype program. The author explains that many of our present interests such as critical thinking, decision making, inquiry, reflective thinking, foundational studies, and cultural literacy can be found within the texts of the 1916 social studies program. Saxe also shows that the roots of the social studies program are found in the social sciences and not the traditional history curriculum. Included are chronological time lines that serve to illustrate the growth of the social studies, as well as an extensive bibliography of the primary foundational works of the social studies, including the 1916 report. These materials greatly enhance the value of Saxe's work for social studies educators and students.

This book examines the approach to civic education in six societies located on the Pacific Rim: Australia, Japan, Hong Kong, Taiwan, Thailand, and the US. In these scrupulously designed studies, the contributors investigate the recent re-emergence of civic education in this region. Developments such as globalization, nationalism, and sovereignty have profound effects on how schools make "good citizens." These essays reveal how definitions of citizenship are contested and revised under such influences, and interrogate differences in civic education from nation to nation. As societies attempt to strike a balance between obedience and critical thinking, schools become the primary site of these transformations.

Analyzing both educational policy and its implementation, these contributors offer a groundbreaking, comparative study that grounds civic education historically and politically.

Our Constitution and Government Public Affairs

At a time of questionable civility in American politics, democratic education appears to be at a crossroads. As we consider how to best explore democracy and foster a more civically-engaged populace in the current socio-political context, it is critical to examine what frames our educational systems, policies, and practices and shapes our civic identity. While teachers struggle with decreased instructional time for social studies and the demands of standardized tests, the social sciences are often pushed to the margins. Reflecting on how to negotiate local, state, national, and global tensions related to policy and practice, educators work to do what is best to equip students to foster democratic citizenship and ideals. Social sciences educators are uniquely positioned to embrace a journey that upholds democratic ideals of equality, freedom, and justice, while simultaneously critiquing inequity and injustice in schools and our society. The contributors to this volume situate a variety of discussions within the context of the crossroads and explore how to negotiate, translate, and reconceptualize our own beliefs and positionings in ways that positively influence and empower students, teachers, teacher educators, and education policy makers. Studies are presented related to civic education, cross-cultural interpretations, emotional citizenship, international economics, and race-consciousness, as well as those that discuss how to challenge dominant narratives and negotiate educational policies and practices.

An earlier edition of this extraordinarily prescient, elegantly written book created a sensation among Washington and media insiders when it was published more than five years ago under the title `Demosclerosis. In it, Jonathan Rauch, a former correspondent for The Economist and a columnist for National Journal, showed with startling clarity the reasons why America's political system (and, in fact, other political systems as well) was becoming increasingly ineffective. Today, as Rauch's predictions continue to manifest themselves in a national politics of "sound and fury" and little effective legislation, and in increasing voter cynicism, this book has achieved renown as the classic and essential work on why politics and government don't work.

A team of researchers from 35 states across the country developed a survey designed to create a snapshot of social studies teaching and learning in the United States. With over 12,000 responses, it is the largest survey of social studies teachers in over three decades. We asked teachers about their curricular goals, their methods of instruction, their use of technology, and the way they address the needs of English language learners and students with disabilities. We gathered demographic data too, along with inquiries about the teachers' training, their professional development experiences, and even whether they serve as coaches.

The enormous data set from this project was analyzed by multiple research teams, each with its own chapter. This volume would be a valuable resource for any professor, doctoral student, or Master ' s student examining the field of social studies education. It is hard to imagine a research study, topical article, or professional development session concerning social studies that would not quote findings from this book about the current status of social studies. With chapters on such key issues as the teaching of history, how teachers address religion, social studies teachers ' use of technology, and how teachers adapt their instruction for students with disabilities or for English language learners, the book ' s content will immediately be relevant and useful.
