Governments fail to provide the public goods needed for development when its leaders knowingly and deliberately ignore sound technical advice or are unable to follow it, despite the best of intentions, because of political constraints. This report focuses on two forces--citizen engagement and transparency--that hold the key to solving government failures by shaping how political markets function. Citizens are not only queuing at voting booths, but are also taking to the streets and using diverse media to pressure, sanction and select the leaders who wield power within government, including by entering as contenders for leadership. This political engagement can function in highly nuanced ways within the same formal institutional context and across the political spectrum, from autocracies to democracies. Unhealthy political engagement, when leaders are selected and sanctioned on the basis of their provision of private benefits rather than public goods, gives rise to government failures. The solutions to these failures lie in fostering healthy political engagement within any institutional context, and not in circumventing or suppressing it. Transparency, which is citizen access to publicly available information about the actions of those in government, and the consequences of these actions, can play a crucial role by nourishing political engagement.

The story of West Indian immigrants to the United States is generally considered to be a great success. Mary Waters, however, tells a very different story. She finds that the values that gain first-generation immigrants initial success--a willingness to work hard, a lack of attention to racism, a desire for education, an incentive to save--are undermined by the realities of life and race relations in the United States. Contrary to long-held beliefs, Waters finds, those who resist Americanization are most likely to succeed economically, especially in the second generation.

Is civic identity in the United States really defined by liberal, democratic political principles? Or is U.S. citizenship the product of multiple traditions--not only liberalism and republicanism but also white supremacy, Anglo-Saxon supremacy, Protestant supremacy, and male supremacy? In this powerful and disturbing book, Rogers Smith traces political struggles over U.S. citizenship laws from the colonial period through the Progressive era and shows that throughout this time, most adults were legally denied access to full citizenship, including political rights, solely because of their race, ethnicity, or gender. Basic conflicts over these denials have driven political development and civic membership in the U.S., Smith argues. These conflicts are what truly define U.S. civic identity up to this day. Others have claimed that nativist, racist, and sexist traditions have been marginal or that they are purely products of capitalist institutions. In contrast, Smith's pathbreaking account explains why these traditions have been central to American political and economic life. He shows that in the politics of nation building, principles of democracy and liberty have often failed to foster a sense of shared "peoplehood" and have instead led many Americans to claim that they are a "chosen people," a "master race" or superior culture, with distinctive gender roles. Smith concludes that today the United States is in a period of reaction against the egalitarian civic reforms of the last generation, with nativist, racist, and sexist beliefs regaining influence. He suggests ways that proponents of liberal democracy should alter their view of U.S. citizenship in order to combat these developments more effectively.

Educating for citizenship was the original mission of American schools, but for decades that knowledge--also known as civics education--has been in decline, as schools have shifted focus to college and career, STEM, and raising reading and math scores. But over the last few years, spurred on by political polarization and a steep decline in public understanding, civics education is seeing a nation-wide resurgence, as school leaders, educators, and parents recognize the urgency of teaching young people how America works--especially young people who have been marginalized from the political system. But this isn ' t your grandmother ' s civics. The " new " civics has been updated and re-tooled for the phone-addicted, multi-cultural, globalized twenty-first century kid. From combatting " fake news " with fact checking in Silicon Valley, to reviving elementary school social studies in Nashville, to learning civic activism in Oklahoma City, journalist Holly Korbey documents the grassroots revival happening across the country. Along the way, she provides an essential guidebook for educators, school leaders and caregivers of all types who want to educate a new generation of engaged citizens at a critical time in American democracy.
