The first international symposium on NDT-CE (Non-Destructive Testing in Civil

Engineering) was held in Berlin, Germany in 1991. Successive symposia were held throughout Europe until 1997. This, the 5th symposium is organized as SEIKEN SYMPOSIUM No. 26, and is sponsored by the Institute of Industrial Science, at the University of Tokyo, Japan. Original objectives of the NDT-CE symposium have been to provide an opportunity for discussing current issues and future perspectives of NDT and for promoting mutual understanding among engineers and researchers. Asia is one of the key regions for further development in NDT and this symposium in Japan will be a good opportunity not only to exchange technical information on NDT, but to promote worldwide friendship between engineers in Asian countries and other nations of the world. This volume contains 70 papers providing the most recent

research results and findings. The papers are grouped under the following areas: (1) keynote papers, (2) magnetic / electric, (3) steel structures, (4) integrated test, (5) moisture, (6) strength, (7) acoustic emission, (8) various tests, (9) ultrasonic, (10) impact echo, (11) radar, (12) quality and (13) corrosion / cover.

Although historians have devoted a great deal of attention to the development of federal government policy regarding civil rights in the quarter century following World War II, little attention has been paid to the equally important developments at the state level. Few states underwent a more dramatic transformation with regard to civil rights than Michigan did.

In 1948, the Michigan Committee on Civil Rights characterized the state of civil rights in Michigan as presenting "an ugly picture". Twenty years later, Michigan was a leader among the states in civil rights legislation. Expanding the Frontiers of Civil Rights documents this important shift in state level policy and makes clear that civil rights in Michigan embraced not only blacks but women, the elderly, native Americans, migrant workers, and the physically handicapped. Sidney Fine's treatment of civil rights in Michigan is based on an exhaustive examination of unpublished, published, and interview sources. Fine relates civil rights developments in Michigan to civil rights actions by the federal government and

other states. He focuses on the administrations of the three governors -- Democrats G. Mennen Williams (1949-1960), and John B. Swainson (1961-1962), and Republican George Romney (1963-1969) -- and the roles they played in furthering civil rights in Michigan, as well as other politicians and policymakers. Students of state history, civil rights history, and those interested in post-World War II history will find few accounts as broad ranging as this study of state civil rights legislation during the years the book covers.

The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions,

disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts.
