South Africa is characterised by a youthful population, and the challenges and possibilities that characterise the young generation are both warning signs and beacons of hope for a nation founded on social justice.

Youth in South Africa: Agency, (in)visibility and national development takes stock of the nation's development as it affects young people. Authors offer both personal and professional insights into the ways in which the youth navigate their own pathways to adulthood.

These include formal and informal engagements with politics, as well as protest, (un)employment, entrepreneurship, education, religion, experiences with sexuality and violence and a multitude of other life experiences. Contributors paint a picture of the initiative, agency and resilience of the youth, as well as the challenges before them. Authors also identify the state of "waithood" faced by those unable to make the transition out of youth into full adulthood as a result of their socio-economic circumstances and political context. By engaging these experiences and insights, and primarily informed by the inputs of young people, the authors highlight the limitations of existing youth policies and frameworks. The case is made for policy instruments to be informed by the lived experiences of the youth as they navigate a complex macrosocial environment, and by the messages the youth communicate about the limitations of current approaches.

A RADIO 4 BOOK OF THE WEEK and a powerful and deeply personal exploration of a

divided country - and a hopeful vision for change. 'This is not another book about the relationship between Muslims and non-Muslims. It is THE book. . . Absolutely not to be missed.' - Matthew d'Ancona

Sarfraz Manzoor grew up in a working-class Pakistani Muslim family in Luton - where he was raised to believe that they were different, they had an alien culture and they would never accept him. They were white people. In today's deeply divided Britain we are often told they are different, they have a different culture and values and they will never accept this country. This time they are Muslims. Weaving together history, reportage and memoir, Sarfraz Manzoor journeys around Britain in search of the roots of this division - from the fear that Islam promotes violence, to the suspicion that Muslims wish to live segregated lives, to the belief that Islam is fundamentally misogynistic. THEY is also Manzoor's search for a more positive future. We hear stories from Islamic history of a faith more tolerant and progressive than commonly assumed, and

stories of hope from across the country which show how we might bridge the chasm of mutual mistrust. THEY is at once fiercely urgent, resolutely hopeful and profoundly personal. It is the story of modern, Muslim Britain as it has never been told.

Demand for tech professionals is expected to increase substantially over the next decade, and increasing the number of women of color in tech will be critical to building and maintaining a competitive workforce. Despite years of efforts to increase the diversity of the tech workforce, women of color have remained underrepresented, and the numbers of some groups of women of color have even declined. Even in cases

where some groups of women of color may have higher levels of representation, data show that they still face significant systemic challenges in advancing to positions of leadership. Research evidence suggests that structural and social barriers in tech education, the tech workforce, and in venture capital investment disproportionately and negatively affect women of color.

Transforming Trajectories for Women of Color in Tech uses current research as well as information obtained through four public information-gathering workshops to provide recommendations to a broad set of stakeholders within the tech ecosystem for increasing recruitment, retention, and advancement of women of color. This report identifies gaps in existing research that obscure the nature of challenges faced by women of color in tech, addresses systemic

issues that negatively affect outcomes for women of color in tech, and provides guidance for transforming existing systems and implementing evidence-based policies and practices to increase the success of women of color in tech.

Of all the PE exams, more people take the civil than any other discipline. The eight-hour, open-book, multiple-choice exam is given every April and October. The exam format is breadth-and-depth -- all examinees are tested on the breadth of civil engineering in the morning session; in the afternoon, they select one of five specialties to be tested on in-depth. Our civil PE books are current with the exam; they reflect the new format, and they reference all the same codes used on the exam. Quick Reference, which facilitates finding formulas during the exam; and subject-specific reviews on the complex areas of bridge and timber design. -- Organizes all important formulas for fast access during the exam -- Corresponds to topics in the Civil Engineering Reference Manual, 8th ed.

' The Collected Works of Ann Hawkshaw ' brings together Hawkshaw ' s four volumes of poetry and republishes them for the first time. Debbie Bark ' s biography, introduction and notes highlight Hawkshaw ' s most significant poems and propose

connections with more canonical works alongside which her writing can be productively viewed. Hawkshaw ' s writings have been largely neglected since the early twentieth century, but this new volume reaffirms their ability to offer an exceptional insight into the changing political and religious landscape of the Victorian period.

Education of Civil Engineers: Training for

Civil Engineering
"UNESCO has recently published the third volume of its Education on the Move series, a series dedicated to the analysis of key trends in education with the hope of inspiring dialogue among policy makers, educators and other key stakeholders on the challenges of education for tomorrow. The latest publication, entitled Unleashing the Potential: Transforming Technical and Vocational Education and Training is focused entirely on issues related to technical and vocational education and training (TVET). It takes stock of the steadily increasing demands and expectations on TVET systems around the globe and presents recent policy trends in the field of TVET. In their analysis, the authors provide insights into what it takes to unleash the potential of TVET systems around the world. They propose an integrated analytical approach that takes into consideration such factors as economic growth, social equity and issues related to sustainability so that TVET can contribute more effectively to contemporary policy issues such as youth unemployment, gender disparities and climate change. Overall, the book calls for a transformation of TVET systems to enable them to respond to the

demands of their contexts. This transformation should enable TVET systems to acquire agility to stay current and responsive to the rapidly changing demands of the twenty-first century."--Publisher's website.
