The book is useful for all vacancies of Commission like Assistant Engineer, Executive Engineer, Deputy Executive Engineer, Additional Assistant Engineer, etc. in various departments such as R&B, Narmada Water Resource, Municipal Corporation, Health & Family Welfare and Gujarat Water Supply. The book consists complete syllabus of Civil Engineering bifurcated topic-wise including all small topics, and also carry proper solution of each question.

Textbook of Thermal Engineering Infinity Educations

Designed as an introductory text for the undergraduate first-year students of all branches of engineering, the present book covers the basics of civil engineering which is required by the students in the beginning of their four-year engineering studies. This textbook covers four parts of civil engineering: Building materials, Building construction and architecture, Surveying, and Highway engineering. All the chapters are arranged in a logical sequence in order to maintain the continuity of the different parts as per the syllabus. Illustrated numerical examples are solved in the chapter wherever necessary. All the worked out examples have relevance to the theory and equations covered in the Chapters end exercises at the end of each chapter help students to absorb concepts, and thus reinforce the understanding of the subject. In a nutshell, this volume contains the complete contents of the course comprising four sub-branches of civil engineering in a single condensed form.

Surveyor UM Libraries

This Book is designed for Civil Engineering aspirants those are appearing in Mains Exam of JPSC (Jharkhand Public Service Commission) Assistant Engineer. It covers complete syllabus of Section-I (Objective Papers) of JPSC Mains by dividing it in three parts; Civil Engineering Paper-I, Civil Engineering Paper-II and General Ability according to the Exam pattern. The Book not only consists major subjects of Civil Engineering, like SOM, TOS, Building Materials, RCC, Steel, Soil, Environment, FM, Machines, Highways, but also, includes minor subjects, such as Railway and Airport, Docks and Harbour, etc. Even, in the Book, the General Ability part is also classified in sub-parts of General English, Indian History, Polity, Economy, Geography, General Science and in most important Current Affairs. The Book also includes questions of Previous Year JPSC Mains Exam. There are a total of 4100+ questions in the Book published in more than 600 Pages. Due to its exam oriented pattern, we hope, this Book will fulfill all needs of aspirants of JPSC Mains.

New Civil Engineer

The Reminiscences of a Civil Engineering Contractor provides an account of the various engineering works of Robert Brodie, a civil engineer. This book covers several engineering projects, including Tay Bridge Railways, Montrose and Arbroath Railway, Scarborough and Whitby Railway, Mersey Railway, Loch Katrine aqueduct, Peterhead Harbor improvement, and Fraserburgh Harbor improvement. Organized into two parts encompassing 16 chapters, this book begins with an overview of the Tay Bridge work. This text then discusses the construction of the missing link of the East Coast route between Arbrouth and Kinaber junction, including rock cuttings and extensive viaducts. Other chapters consider the various contracts at Swansea. This book discusses as well the establishment of the Federation of Civil Engineering Contractors in 1919. The final chapter deals with other contracts, including railways, docks, roads, reservoirs, pipe tracks, and catchment board improvements all over Wales and England. This book is a valuable resource for civil engineers.

Highway Engineering

As environmental issues remain at the forefront of energy research, renewable energy is now an all-important field of study. And as smart technology continues to grow and be refined, its applications broaden and increase in their potential to revolutionize sustainability studies. This potential can only be fully realized with a thorough understanding of the most recent breakthroughs in the field. Research Advancements in Smart Technology, Optimization, and Renewable Energy is a collection of innovative research that explores the recent steps forward for smart applications in sustainability. Featuring coverage on a wide range of topics including energy assessment, neural fuzzy control, and biogeography, this book is ideally designed for advocates, policymakers, engineers, software developers, academicians, researchers, and students.
