Global Investigations

Review's The Practitioner's Guide to Global Investigations covers what to do at every stage during the lifecycle of a corporate investigation - from discovery of the initial problem to conclusion and beyond. Using US and UK practice and procedure to illustrate, the guide tracks the development of a serious allegation (whether originating inside or outside a company) as it develops - looking at the key risks that arise and the challenges it poses, along with the opportunities that may exist for its resolution. It offers expert insight into fact-gathering (including document preservation and collection, and witness

interviews); structuring the investigation (the complexities of cross-border privilege issues); and strategizing effectively to resolve cross-border probes and manage corporate reputation. Further content provides detailed comparable surveys of the relevant law and practice in 12 jurisdictions that build on many of the vital issues highlighted. It is practical guide for external and in house legal counsel, compliance officers and accounting practitioners wishing to benchmark their practice against leaders in the field. Edited by Judith Seddon, Eleanor Davison, Christopher J Morvillo, Michael Bowes QC and Luke Tolaini, the book has 47 chapters

---

contributed by leading practitioners and firms across the world such as Baker & McKenzie LLP, Clifford Chance LLP, Skadden, Arps, Slate, Meagher & Flom LLP. "Global Investigations Review's The Practitioner's Guide to Global Investigations is the most comprehensive publication currently on the market in relation to cross-border, multifaceted corporate investigations. It does what it says on the tin - 'How does one conduct such an investigation? And what does one have in mind at various times?' - and it does it rather well."

In preparing a book of etiquette for ladies, I would lay down as the first rule, "Do unto others as you would others should do to you." You can never be rude if you bear the rule always in mind, for what lady likes to be treated rudely? True Christian politeness will always be the result of an unselfish regard for the feelings of others, and though you may err in the ceremonious points of etiquette, you will never be impolite. Politeness, founded upon such a rule, becomes the expression, in graceful manner, of

social virtues. The spirit of politeness consists in a certain attention to forms and ceremonies, which are meant both to please others and ourselves, and to make others pleased with us; a still clearer definition may be given by saying that politeness is goodness of heart put into daily practice; there can be no true politeness without kindness, purity, singleness of heart, and sensibility.

birth of the Tsar's vast Russian Empire. In 1700, seeking to open Russian trade routes to the West, the Tsar combined with Denmark, Saxony and Poland to attack Swedish hegemony in the North. Against the odds, King Charles XII of Sweden subdued the hostile coalition for nearly a decade, but in 1708 took his fatal decision to march for Moscow. His defeat at Poltava, in the Ukraine, proved the turning-point of the Great Northern War, heralding the collapse of the Swedish Empire and the rise of Russia, the effects of which would be felt for

almost three hundred years. Swedish historian Peter Englund's vivid account of the three violent days of battle is an internationally acclaimed classic of military history, admired by scholars and the lay reader alike. *Netbooks: The Missing Manual* Oxford University Press This world history text provides a comprehensive overview of ancient history from Creation through the 1620s, from a Christian perspective. What if our civilization were to collapse? Not many centuries into the future, but in our own lifetimes? Most people recognize that we face huge challenges today, from climate change and its potentially catastrophic consequences to a plethora of socio-political problems, but we find it hard to face up to the very real possibility that these crises could produce a collapse of our entire civilization. Yet we now have a

great deal of evidence to suggest that we are up against growing systemic instabilities that pose a serious threat to the capacity of human populations to maintain themselves in a sustainable environment. In this important book, Pablo Servigne and Raphaël Stevens confront these issues head-on. They examine the scientific evidence and show how its findings, often presented in a detached and abstract way, are connected to

people's ordinary experiences – joining the dots, as it were, between the Anthropocene and our everyday lives. In so doing they provide a valuable guide that will help everyone make sense of the new and potentially catastrophic situation in which we now find ourselves. Today, utopia has changed sides: it is the utopians who believe that everything can continue as before, while realists put their energy into making a transition and building local resilience.

---

Collapse is the horizon of our generation. But collapse is not the end – it's the beginning of our future. We will reinvent new ways of living in the world and being attentive to ourselves, to other human beings and to all our fellow creatures.
