The History of Modern Civilization Palala Press

This handbook explores the evolution of African education in historical perspectives as well as the development within its three systems—Indigenous, Islamic, and Western education models—and how African societies have maintained and changed their approaches to education within and across these systems. African education continues to find itself at once preserving its knowledge, while integrating Islamic and Western aspects in order to compete within this global reality. Contributors take up issues and themes of the positioning, resistance, accommodation, and transformations of indigenous education in relationship to the introduction of Islamic and later Western education. Issues and themes raised acknowledge the contemporary development and positioning of indigenous education within African societies and provide understanding of how indigenous education works within individual societies and national frameworks as an essential part of African contemporary society.

A Manual of the History of the Political System of Europe and Its Colonies Wentworth Press

The Ming dynasty ruled China from 1368 to 1644 CE and replaced the Mongol Yuan dynasty which had been in place since the 13th century CE. During the Ming, China grew from a small state to a global superpower. The Ming were succeeded by the Qing dynasty (1644-1911 CE). Notable events of Ming China included the construction of the Forbidden City - the imperial residence in Beijing, a blossoming of literature and the arts, the first flight of a manned aircraft by Zheng He, and the production of the first printed book - the Ming Shilu. Eventually, though, the same old problems that had bedeviled the Ming emperors: court factions, corruption, and rampant overspending and a disempowered peasantry which fuelled rebellion. As a consequence, the Ming, politically (and militarily) would eventually be overthrown and could not resist the invasion of the Manchus who established the Qing dynasty from 1644 CE. As you read on you would get to understand how the Ming politics influence empire growth and the economical effect of its early leaders and emperors. The book basically circle around the startup of China.
