With the doctrine of unalienable rights failing to halt the expansion of government power over the individual, a new

enlightenment is needed that establishes that man is a free and sovereign being. This self-ownership can be found in man's biology. The evidence already exists; it only needs to be expressed. In this fascinating and engaging book, Thomas delves into the biological basis underpinning the drive for self-preservation found in many species of plants and animals. He shows that, not only do plants and animals defend their own lives, they have a genetically based drive for owning, holding,

and defending property. The evidence shows that humans share the same drives as thousands of other life forms, and that these drives are deeply imbedded in the structure of DNA. In the quest to be free from war, dictatorship and political pestilence, man has struggled for thousands of years against the intraspecies predators who push him towards calamities that have resulted in the deaths, misery and enslavement of millions. Employing a radically different style of thinking, Thomas embarks on a critical review of many human misconceptions, including the concepts of natural rights, the collective, duty and the alienation of man from nature. He then goes about proposing a rational alternative to these delusional doctrines.

By far the biggest change to The UK Pesticide Guide in 2020 is the loss of a number of active ingredients that have been fundamental to many crop protection programmes. The final use-up of chlorothalonil formulations; propiconazole, fenpropimorph, chloridazon and diquat occurs in 2020 but there are also a few exciting new additions. Aclonifen is a new residual herbicide for use in potatoes that already has a number of EAMUs for use in minor crops. BASF is launching its new triazole, mefentrifluconazole, which promises to restore full triazole activity, at least initially. On the insecticide front the new active ingredient from Corteva agriscience, sulfoxaflor, is now listed for use in Cucurbitae and ornamentals under full protection for control of aphids and whitefly.

This is the story, in part, of one of the most successful "worldwide" ranges of tractors, introduced by Ford in 1964. It is about those Ford models which didn't seem to be very popular in 1964, at least to begin with.

Through time, however, they have become an accepted part of the world scene in agricultural mechanization. There is, in fact, still some of

the original 6X conception in the latest models from Ford.

A HILARIOUS COMPILATION OF THE WORST JOB APPLICATIONS IMAGINABLE - A PERFECT STOCKING FILLER OR OFFICE SECRET SANTA GIFT THIS CHRISTMAS.

Ever read a truly terrible job application? Or perhaps slightly exaggerated the truth on one of your own... We've all been there - but these are worse. So much worse. From overly-honest cover letters, embarrassing typos, and mortifying personal revelations, to awkward interview questions, misplaced self-confidence, and, of course, outright lies. This hilarious collection of shockingly dreadful job applications, crap CVs and excruciating interviews will have you laughing out loud, while also making you feel so much better about yourself - because at least you weren't ever this bad . . . Application for Employment I refer to the recent death of the Technical Manager at your company and hereby apply for the replacement of the deceased manager. Each time I apply for a job, I get a reply that there is no vacancy but in this case I have caught you red-handed and you have no excuse because I even attended the funeral to be sure that he was truly dead and buried before applying. Attached to my letter is a copy of my CV and his death certificate. The Interview: Q. Is there anything about this job that you feel you

might not be very good at? A. Dealing with people.

Q. What person, living or dead, would you most like to meet? A. The living one.

The little grey Fergie is Britain's best-loved tractor, the light user-friendly machine that finally replaced the horse on farms. This highly illustrated account covers the full history of Harry Ferguson's tractor products from his pioneering work before the 1930s to the merger with Massey in 1957. The author has had access to fresh archive material and has interviewed many of the surviving men who were associated with Ferguson. The appeal of the Fergie lay in its lightness and utility, and also in the system of mechanized farming of which it was a part. Throughout the book, reference is made to the implements which lay at the heart of the system. Stuart Gibbard has won "Tractor and Machinery" magazine's award for the best British tractor book five years running.
