How Putting Shareholders First Harms Investors, Corporations, and the Public Princeton University Press

A #1 NEW YORK TIMES BESTSELLER One of the most salient features of our culture is that there is so much bullshit. Everyone knows this. Each of us contributes his share. But we tend to take the situation for granted. Most people are rather confident of their ability to recognize bullshit and to avoid being taken in by it. So the phenomenon has not aroused much deliberate concern. We have no clear understanding of what bullshit is, why there is so much of it, or what functions it serves. And we lack a conscientiously developed appreciation of what it means to us. In other words, as Harry Frankfurt writes, "we have no theory." Frankfurt, one of the world's most influential moral philosophers, attempts to build such a theory here. With his characteristic combination of philosophical acuity, psychological insight, and wry humor, Frankfurt proceeds by exploring how bullshit and the related concept of humbug are distinct from lying. He argues that bullshitters misrepresent themselves to their audience not as liars do, that is, by deliberately making false claims about what is true. In fact, bullshit need not be untrue at all. Rather, bullshitters seek to convey a certain impression of themselves without being concerned about whether anything at all is true. They quietly change the rules governing their end of the conversation so that claims about truth and falsity are irrelevant. Frankfurt concludes that although bullshit can take many innocent forms, excessive indulgence in it can eventually undermine the practitioner's capacity to tell the truth in a way that lying does not. Liars at least acknowledge that it matters what is true. By virtue of this, Frankfurt writes, bullshit is a greater enemy of the truth than lies are.

The New York Times best-selling book exploring the counterproductive reactions white people have when their assumptions about race are challenged, and how these reactions maintain racial inequality. In this "vital, necessary, and beautiful book" (Michael Eric Dyson), antiracist educator Robin DiAngelo deftly illuminates the phenomenon of white fragility and "allows us to understand racism as a practice not restricted to 'bad people' (Claudia Rankine). Referring to the defensive moves that white people make when challenged racially, white fragility is characterized by emotions such as anger, fear, and guilt, and by behaviors including argumentation and silence. These behaviors, in turn, function to reinstate white racial equilibrium and prevent any meaningful cross-racial dialogue. In this in-depth exploration, DiAngelo examines how white fragility develops, how it protects racial inequality, and what we can do to engage more constructively.

Executives, investors, and the business press routinely chant the mantra that corporations are required to "maximize shareholder value." In this pathbreaking book,

renowned corporate expert Lynn Stout debunks the myth that corporate law mandates shareholder primacy. Stout shows how shareholder value thinking endangers not only investors but the rest of us as well, leading managers to focus myopically on short-term earnings; discouraging investment and innovation; harming employees, customers, and communities; and causing companies to indulge in reckless, sociopathic, and irresponsible behaviors. And she looks at new models of corporate purpose that better serve the needs of investors, corporations, and society.

"Surging sea levels are inundating the coasts." "Hurricanes and tornadoes are becoming fiercer and more frequent." "Climate change will be an economic disaster." You've heard all this presented as fact. But according to science, all of these statements are profoundly misleading. When it comes to climate change, the media, politicians, and other prominent voices have declared that "the science is settled." In reality, the long game of telephone from research to reports to the popular media is corrupted by misunderstanding and misinformation. Core questions—about the way the climate is responding to our influence, and what the impacts will be—remain largely unanswered. The climate is changing, but the why and how aren't as clear as you've probably been led to believe. Now, one of America's most distinguished scientists is clearing away the fog to explain what science really says (and doesn't say) about our changing climate. In *Unsettled: What Climate Science Tells Us, What It Doesn't, and Why It Matters*, Steven Koonin draws upon his decades of experience—including as a top science advisor to the Obama administration—to provide up-to-date insights and expert perspective free from political agendas. Fascinating, clear-headed, and full of surprises, this book gives readers the tools to both understand the climate issue and be savvier consumers of science media in general. Koonin takes readers behind the headlines to the more nuanced science itself, showing us where it comes from and guiding us through the implications of the evidence. He dispels popular myths and unveils little-known truths: despite a dramatic rise in greenhouse gas emissions, global temperatures actually decreased from 1940 to 1970. What's more, the models we use to predict the future aren't able to accurately describe the climate of the past, suggesting they are deeply flawed. Koonin also tackles society's response to a changing climate, using data-driven analysis to explain why many proposed "solutions" would be ineffective, and discussing how alternatives like adaptation and, if necessary, geoengineering will ensure humanity continues to prosper. *Unsettled* is a reality check buoyed by hope, offering the truth about climate science that you aren't getting elsewhere—what we know, what we don't, and what it all means for our future.

Featuring a new introduction, this updated edition of the New York Times bestselling classic by Pulitzer Prize and National Book Award – winning author and one of the most revered figures in American letters is "profound and priceless as guidance for anyone who aspires to write" (Los Angeles Times). Born in 1909 in Jackson, Mississippi, Eudora Welty shares details of her upbringing that show us how her family and her surroundings contributed to the shaping not only of her personality but of her writing as well. Everyday sights, sounds, and objects resonate with the emotions of recollection: the striking clocks, the Victrola, her orphaned father's coverless little book saved since boyhood, the tall mountains of the West Virginia back country that became a metaphor for her mother's sturdy independence, Eudora's earliest box camera that suspended a moment forever and taught her that every feeling awaits a gesture. In her vivid descriptions of growing up in the South—of the interplay between black and white, between town and countryside, between dedicated schoolteachers and the children they taught—she recreates the vanished world of her youth with the same subtlety and insight that mark her fiction, capturing "the mysterious transfiguring gift by which dream, memory, and experience become art" (Los Angeles Times Book Review). Part memoir, part exploration of the seeds of creativity, this unique distillation of a writer's beginnings offers a rare glimpse into the Mississippi childhood that made Eudora Welty the acclaimed and important writer she would become.

The Collapse of the Fact/Value Dichotomy and Other Essays Beacon Press

This fine blend of Harvard scholarship and seasoned judgment is really two books in one. The first develops a sophisticated approach to negotiation for executives, attorneys, diplomats -- indeed, for anyone who bargains or studies its challenges. The second offers a new and compelling vision of the successful manager: as a strong, often subtle negotiator, constantly shaping agreements and informal understandings throughout the complex web of relationships in an organization. Effective managers must be able to reach good formal accords such as contracts, out-of-court settlements, and joint venture agreements. Yet they also have to negotiate with others on whom they depend for results, resources, and authority. Whether getting fuller support from the marketing department, hammering out next year's budget, or winning the approval for a new line of business, managers must be adept at advantageously working out and modifying understandings, resolving disputes, and finding mutual gains where interests and perceptions conflict. In such situations, *The Manager as Negotiator* shows how to creatively further the totality of one's interests, including important relationships -- in a way that Richard Walton, Harvard Business School Professor of Organizational Behavior, describes as "sensitive to the nuances of negotiating in organizations" and "relentless and skillful in making systematic sense of the process." This book differs fundamentally from the recent spate of negotiation handbooks that tend to espouse one of two approaches: the competitive ("Get yours and most of theirs, too") or the cooperative ("Everyone can always win"). Transcending such cynical and naive views, the authors develop a comprehensive approach, based on strategies and tactics for productively managing the tension between the cooperation and competition that are both inherent in bargaining. Based on the authors' extensive experience with hundreds of cases, and peppered with a number of wide-ranging examples, *The Manager as Negotiator* will be invaluable to novice and experienced negotiators, public and private managers, academics, and anyone who needs to know the state of the art in this important field.

Concerned with the trendy, technocratic, and at times sophisticated character of contemporary education at all levels, both public and private, the authors of this collection seek to reinvigorate a Thomistic approach to education appropriate to the problems of our day. With its main inspiration taken from the work of Jacques Maritain, especially his 1943 Education at the Crossroads, the volume presents a trenchant critique of the "privacies" of contemporary education, with its emphasis upon the conventional and useful. At the same time, the essays present the outlines of the proper alternative, an education which helps students draw out from themselves the desire for truths which transcend the contingencies of culture and utility. Such an education seeks to guide students to "the common things" available to all human beings. The essays uphold an account of man's intellectual and affective capacities which understands these capacities as naturally ordered to truth. The essays approach the task in different but complementary ways: in critiques of contemporary theories of education, in speculative accounts of knowledge and learning, in applications of theory to specific institutional settings, and in discussions of the political contexts governing modern education. In this rich variety of ways, the essays in The Common Things not only point the way back to the crossroads Maritain spoke of fifty years ago; they go on to indicate something of the landscape along the road not taken by contemporary education. ABOUT THE EDITOR: Daniel McInerney is assistant professor of philosophy at the University of St. Thomas/Center for Thomistic Studies in Houston, Texas. THE CONTRIBUTORS: In addition to the editor, the contributors to the volume are: Benedict M. Ashley, O.P., Romanus Cessario, O.P., Charles Dechert, Donald DeMarco, Curtis L. Hancock, Gregory J.
