This early work by H. H. Munro was originally published in 1911 and we are now republishing it with a brand new introductory

biography. 'The Chronicles of Clovis' is a collection of short stories, including 'The Great Weep', 'Tobermory', 'Adrian', and many more. Hector Hugh Munro was born in Akyab, Burma in 1870. He was raised by aunts in North Devon, England, before returning to Burma in his early twenties to join the Colonial Burmese Military Police. Later, Munro returned once more to England, where he embarked on his career as a journalist, becoming well-known for his satirical 'Alice in Westminster' political sketches, which appeared in the Westminster Gazette. Arguably better-remembered by his pen name, 'Saki', Munro is now considered a master of the short story, with tales such as 'The Open Window' regarded as examples of the form at its finest.

In a time of uncertainty about our environmental future—an eye-opening global tour of some of the most wounded places on earth, and stories of how a passionate group of eco-restorers is leading the way to their revitalization. Award-winning science journalist Judith D.

Schwartz takes us first to China's Loess Plateau, where a landmark project has successfully restored a blighted region the size of Belgium, lifting millions of people out of poverty. She journeys on to Norway, where a young indigenous reindeer herder challenges the most powerful orthodoxies of conservation—and his own government.

And in the Middle East, she follows the visionary work of an ambitious young

American as he attempts to re-engineer the desert ecosystem, using plants as his most sophisticated technology. Schwartz explores regenerative solutions across a range of landscapes: deserts, grasslands, tropics, tundra, Mediterranean. She also highlights various human landscapes, the legacy of colonialism and industrial agriculture, and the endurance of indigenous knowledge.

The Reindeer Chronicles demonstrates how solutions to seemingly intractable problems can come from the unlikeliest of places, and how the restoration of local water, carbon, nutrient, and energy cycles can play a dramatic role in stabilizing the global climate. Ultimately, it reveals how much is in our hands if we can find a way to work together and follow nature's lead.
