Gender Ideologies and Military Labor Markets in the U.S. offers a comprehensive analysis of the relationship between changes in military gender ideologies and structural changes in U.S. military and society. By investigating how social and military change have influenced gender ideologies, the author develops an approach that (re-)connects military gender ideologies to the social conditions of their production and distribution and explains their transformation as effects of changing social and political relations and conflicts. Examining the role of different groups of social actors, media debates on women's military participation and gender ideologies inherent in depictions of military women, the author seeks to contextualise these ideologies are within structural change in the U.S. military and society, relating them to the gender-specific division of labour on civilian and military labor markets. This work provides a deeper understanding of the nexus between military re-structuring processes, women's military integration, and changes of gender ideologies in regard to war and the military, and will be of great interest to students and scholars of gender, security studies and American politics.

Kennewick Man, known as the Ancient One to Native Americans, has been the lightning rod for conflict between archaeologists and indigenous peoples in the United States. A decade-long legal case pitted scientists against Native American communities and highlighted the shortcomings of the Native American Graves and Repatriation Act (NAGPRA), designed to protect Native remains. In this volume, we hear from the many sides of this issue—archaeologists, tribal leaders, and others—as well as views from the international community. The wider implications of the case and its resolution is explored. Comparisons are made to similar cases in other countries and how they have been handled. Appendixes provide the legal decisions, appeals, and chronology to allow full exploration of this landmark legal struggle. An ideal starting point for discussion of this case in anthropology, archaeology, Native American studies, and cultural property law courses. Sponsored by the World Archaeological Congress.
