The Well of Loneliness, first published in 1928, is a timeless portrayal of lesbian love. The thinly disguised story of Hall's own life, it was banned outright upon publication and almost ruined her literary career as the subject was that of an obscenity trial and forbidden at the time in England. The novel tells the story of Stephen, an ideal child of aristocratic parents—a fencer, a horse rider and a keen scholar. Stephen grows to be a war hero, a bestselling writer and a loyal, protective lover. But Stephen is a woman, and is

attracted to women. As her ambitions drive her, and society incarcerates her, Stephen is forced into desperate actions. Although Gordon's attitude toward her own sexuality is anguished, the novel presents lesbianism as natural and makes a plea for greater tolerance. It became an international bestseller, and for decades was the single most famous lesbian novel.

This book contains the Fifteen Rules for Magic (for soul control), the soul, the White Magician, becoming manifest through its own inherent magical powers. The human being is essentially and inherently divine. The soul is the means whereby humanity evolves a consciousness of divinity, redeems gross matter and liberates the pure flame of spirit from the limitation of form.

Popular opinion suggests that information has become a distinguishing feature of the modern world. Where once economies were built on industry and conquest, we are now instead said to be part of a global information economy. In this new and thoroughly revised edition of his popular book, author Webster brings his work up-to-date both with new theoretical work and with social and technological changes - such as the rapid growth of the internet and accelerated globalization - and reassesses the work of key theorists in light of these changes. This book is essential reading for students of contemporary social theory and anybody interested in social and technological change in the post-war era.

This textbook provides in-depth instruction for conducting psychoeducational assessments of children in grades K-12 and conveying results through detailed, well-written reports. It takes readers step by step through the assessment process – collecting data, writing reports, and

communicating conclusions – for students with conditions spanning the range of IDEA classifications such as autism, learning disabilities, emotional disturbances, and conditions covered by Section 504. The book offers not only a broad understanding of assessment and communication skills, but also of the ethical, legal, cultural, and professional considerations that come with psychoeducational evaluation. And its sample reports model clear, well-organized results accessible to parents and caregivers as well as teachers and colleagues. Key areas of coverage include:

- Assessment basics: the testing environment and protocols, interviewing, and observation.
- Report writing section by section, from reason for referral to summary and recommendations.
- Guidelines for oral reporting, with case examples.
- Special issues in psychoeducational assessment and report writing.
- Sample psychoeducational reports using this framework.

Psychoeducational Assessment and Report Writing is an essential text for graduate students, researchers, professors, and professionals in child and school psychology; assessment, testing, and evaluation; social work; and psychological methods/evaluation.

Dr. Greg Zacharias, former Chief Scientist of the United States Air Force (2015-18), explores next steps in autonomous systems (AS) development, fielding, and training. Rapid advances in AS development and artificial intelligence (AI) research will change how we think about machines, whether they are individual vehicle platforms or networked enterprises. The payoff will be considerable, affording the US military significant protection for aviators, greater effectiveness in employment, and unlimited opportunities for novel and disruptive concepts of operations.

Autonomous Horizons: The Way Forward identifies issues and makes recommendations for the Air Force to take full advantage of this transformational technology.

From the bestselling author of the acclaimed *Chaos and Genius* comes a thoughtful and provocative exploration of the big ideas of the modern era: Information, communication, and information theory. Acclaimed science writer James Gleick presents an eye-opening vision of how our relationship to information has transformed the very nature of human consciousness. A fascinating intellectual journey through the history of communication and information, from the language of Africa's talking drums to the invention of written alphabets; from the electronic transmission of code to the origins of information theory, into the new information age and the current deluge of news, tweets, images, and blogs.

Along the way, Gleick profiles key innovators, including Charles Babbage, Ada Lovelace, Samuel Morse, and Claude Shannon, and reveals how our understanding of information is transforming not only how we look at the world, but how we live.
