The Buddha's teachings center around two basic principles. One is the Four Noble Truths, in which the Buddha diagnoses the problem of suffering and indicates the treatment necessary to remedy this problem. The other is the Noble Eightfold Path, the practical discipline he prescribes to uproot and eliminate the deep underlying causes of suffering. The present book offers, in simple and clear language, a concise yet thorough explanation of the Eightfold Path. Basing himself solidly upon the Buddha's own words, the author examines each factor of the path to determine exactly what it implies in the way of practical training. Finally, in the concluding chapter, he shows how all eight factors of the path function in unison to bring about the realization of the Buddhist goal: enlightenment and liberation.

The peerless young Kovalan leaves his loyal wife Kannaki for the courtesan Madhavi, and though he returns to her, he still meets his death because of her ill-omened ankle bracelet. The Shilappadikaram has been called an epic and even a novel, but it is also a book of general education. Adigal packed his story with information: history merging into myth, religious rites, caste customs, military lore, descriptions of city and country life. And four Cantos are little anthologies of the poetry of the period (seashore and mountain songs, hunters and milkmaid s song). Thus the story gives us a vivid picture of early Indian life in all its aspects.

Kautilya, also known as Chanakya, is India's most illustrious political economist of all time. He regarded economic activity as the driving force behind the functioning of any political dispensation. In fact, he went to the extent of saying that revenue should take priority over the army because sustaining the army was possible out of a well-managed revenue system. Kautilya advocated limiting the taxation power of the State, having low rates of taxation, maintaining a gradual increase in taxation and most importantly devising a tax structure that ensured compliance. He strongly encouraged foreign trade, basing it on the premise that for a successful trade contract to be established, it had to be beneficial to all. He emphasised State control and investment in land, water and mining. Kautilya was a true statesman who bridged the gap between experience and vision. For Kautilya, good governance was paramount. He suggested built-in checks and balances in systems and procedures for the containment of malpractices. Many postulates of Kautilya's philosophy of political economy are applicable to contemporary times.
