Examine the big-league benefits of minor league baseball! *The Minor League Baseball: Community Building Through Hometown Sports* examines the role played by minor league baseball in hundreds of cities and towns across the United States.

Written from the unique perspective of a sociologist who also happens to be an avid baseball fan, the book looks at the contributions minor league teams make to the quality of life in their communities, creating focal points for spirit and cohesiveness while providing opportunities for interaction and entertainment. The book links theory and experience to present a “sociology of baseball” that explains the symbiotic relationship which brings people together for a common purpose—to root, root, root for the home team. From the author:

Minor league baseball is played across the country in more than 100 very different communities. These communities seem to

share a special bond with their teams. As with all sports teams, there is a symbiotic relationship between the team and the city or town that it represents. In the case of major league professional sports, the relationship is often fueled by economic outcomes. On the minor league level, the relationship appears to go beyond mere money and prestige. Minor league teams occupy a special place in our hearts. We are more forgiving when they lose, and extremely proud of them when they win. *Minor League Baseball: Community Building Through Hometown Sports* is a detailed look at the connection between town and team, including: economic benefits (development strategies, community growth) intangible benefits (ballpark camaraderie, hometown pride) fan attachment and attendance (demographic variables, stadium accessibility, “home court advantage”) case studies of two Maryland minor-league franchises--the Class AA Bowie Baysox and the Class A Hagerstown Suns *Minor League Baseball: Community Building*

Through Hometown Sports also includes an introduction to the organizational structure of the minor leagues, a history of each current league, and charts and tables on attendance figures and franchise relocations. This book is essential reading for sociologists, sport sociologists/historians, academics and/or practitioners in the fields of community sociology and psychology, and of course, baseball fans.

The Crowley Millers were the talk of minor league baseball in the 1950s, with crowds totaling nearly 10 times Crowley's population and earning Crowley the nickname of "The Best Little

Baseball Town in the World." The Best Little Baseball Town in the World: The Crowley Millers and Minor League Baseball in the 1950s tells the fun, quirky story of Crowley, Louisiana, in the fifties, a story that reads more like fiction than nonfiction. The Crowley Millers' biggest star was Conklyn Meriwether, a slugger who became infamous after he retired when he killed his in-laws with an axe. Their former manager turned out to be a con man, dying in jail while awaiting trial on embezzlement charges. The 1951 team was torn to pieces after their young centerfielder was struck and killed by lightning during a game. But aside from the tragedy and

turmoil, the Crowley Millers also played some great baseball and were the springboard to stardom for George Brunet and Dan Pfister, two Crowley pitchers who made it to the majors. Interviews with players from the team bring to light never-before-heard stories and inside perspectives on minor league baseball in the fifties, including insight into the social and racial climate of the era, and the inability of baseball in the fifties to help players deal with off-the-field problems. Written by respected minor-league baseball historian Gaylon H. White, *The Best Little Baseball Town in the World* is a fascinating tale for baseball fans and historians alike.

Baseball as a Road to God Cider Mill Press Minor league baseball team names tell the stories of towns throughout North America. From amateur collegiate summer leagues all the way through affiliated Triple-A teams, whose players are on the brink of the Major Leagues, nicknames like T-Bones, Crosscutters, RubberDucks, Wingnuts, and Isotopes-to name just a few-are more than just whimsical, catchy brands. They carry significance unique to their local communities. This book explores the stories behind the nicknames of 100 baseball teams based on interviews with front-office personnel who chose the names and the designers who created the logos.

This book illustrates basic methods of data analysis and probability models by means of baseball statistics collected on players and teams. The idea of the book is to describe statistical thinking in a context that will be familiar and interesting to students. The second edition of Teaching Statistics follows the same structure as the first edition, where the case studies and exercises have been replaced by modern players and teams, and the new types of baseball data from the PitchFX system and fangraphs.com are incorporated into the text.

From the award-winning screenwriter and director of cult classic Bull Durham, the extremely entertaining behind-the-scenes story of the making of the film, and an insightful primer on the art and business of moviemaking. "This book tells you how to make a movie—the whole nine innings of it—out of nothing but sheer

will." –Tony Gilroy, writer/director of Michael Clayton and The Bourne Legacy "The only church that truly feeds the soul, day in, day out, is the church of baseball." –Annie in Bull Durham Bull Durham, the breakthrough 1988 film about a minor league baseball team, is widely revered as the best sports movie of all time. But back in 1987, Ron Shelton was a first-time director and no one was willing to finance a movie about baseball—especially a story set in the

minors. The jury was still out on Kevin Costner's leading-man potential, while Susan Sarandon was already a has-been. There were doubts. But something miraculous happened, and The Church of Baseball attempts to capture why. From organizing a baseball camp for the actors and rewriting key scenes while on set, to dealing with a short production schedule and overcoming the challenge of filming the sport, Shelton brings to life the making of this beloved

American movie. Shelton explains the rarely revealed ins and outs of moviemaking, from a film's inception and financing, screenwriting, casting, the nuts and bolts of directing, the postproduction process, and even through its release. But this is also a book about baseball and its singular romance in the world of sports. Shelton spent six years in the minor leagues before making this film, and his experiences resonate throughout this book. Full of wry humor and

insight, *The Church of Baseball* tells the remarkable story behind an iconic film.

Encyclopedia U of Nebraska Press Flunking Chemistry Class is a parody of the steroid era in Major League Baseball. The novel lampoons the sport as it chronicles some of MLB's absurd attempts to abort the PEDs abuse scandal, which made a

mockery of the national pastime over the last 20 years. The author creates a mythical MBL or Multinational Baseball League that includes domestic franchises such as the Bronx Bloomers, the Hollywood Hedgers and the Metropolitan Mutts. It also introduces some international franchises such as the Sydney Kangaroos and the Seoul Searchers and a global commissioner, Buzz Selout. None of the known cheaters get spared in the book. From Corky Samuels, (the "so so

outfielder" for the Chicago Gumballers,) and Popeye Maloney (the crybaby of the St Louis Scarlets) to A Dork, the sleazy third baseman of the Bronx Bloomers and Barney Bombs the massive leftfielder of the Bay City Mammoths, the characters all have a familiar feel to the avid baseball fan. The author follows the logic that the cover-up is as bad as the crime and ensures that the baseball establishment is appropriately satirized (sodomized?) as well. Bass

Sledgehammer the owner of the Bloomers and Buzz Selout the MBL commissioner are the face of that establishment and they take their lumps along with the "floats" who do their work on the diamond. ***** Three separate plot lines weave together in this baseball tapestry. The most sympathetic plot line follows the hilarious travails of pitcher Sam Crockett, a five tool prospect from Texas as he winds his way through the minor league systems of several MBL teams. Crockett

spends the better part of ten years trying to make it to The Show, with stop offs in towns such as Moose Butt, Montana and Beaufort North Carolina. He even does a gig in the backwater towns of Japan. Along the way his progress is frequently blocked by players who get ahead by cheating through the use of performance enhancing drugs. This plot details the "26th man," multi-billion dollar class action law suit, which threatens the antitrust exemption of the Multinational

Baseball League and eventually reinvigorates Crockett's career. A parallel plot line follows the misadventures of Lester Postal, a sportswriter for the tabloid paper The New York Roast, as he looks to expose the soft underbelly of the conspiracy between the MBL and the players association, the MBLPA. Postal generates tabloid worthy headline stories as he embarks on a mission to ensure that steroid cheaters (a/k/a Floats) never make it to the Corridor

of Conceit. He takes on all comers in his relentless attack on steroid abuse and eventually helps his fifth wife - lawyer, Georgette Postal - as she prepares an eleven figure anti-trust suit. The third storyline covers the activities of the many Floats in the MBL during a twenty year period between 1998 and 2018 as they pass through events such as the Earth Series; congressional hearings; The Witchell-Hunt Report and an absurd talk-radio interview, which

follows an arbitration hearing. This storyline loosely follows an historical perspective on the game of baseball and the players who do their work on the diamond. Every year seems to bring about a new scandal that exposes still more players to the scrutiny of the fans who want an honest game. The parallel plot lines finally intersect in a surprising ending that allows the reader to speculate about the future of chemistry in the game of baseball.
