Researched in incredible
detail, this book explores the

story of the timeless VW bus, from early origins through to the present day. This entirely new edition includes details of many of the different camper conversions, and examines the social history and the T2 's evolution. Including full specifications, production figures and buying advice, this is a must for any VW enthusiast.

How to Paint Classic Cars Veloce Publishing Ltd

Expert practical advice from an experienced race engine builder on how to build a high-performance version of Ford's naturally aspirated 4-cylinder 1600, 1800 & 2000cc Pinto engine which has been used in Ford's most popular cars (Escort, Capri, Cortina & Sierra - Ford/Mercury Capri, Pinto, Bobcat in USA) over many years. Whether the reader wants a fast road car or to go racing, Des explains, without using technical jargon, just how to build a reliable high-power engine using as many stock parts as possible and without wasting money on parts and modifications that don't

work. Also covers Cosworth versions of Pinto engines and fitting Cosworth heads to Pinto blocks. Does not cover 1300, E-Max 1600 or American-built 2300.

The Mini, the car of the 20th Century and still in motorsport in 1997, 35 years after

its 1st event. This is its story. In the 60s the BMC works teams using Mini s were virtually unstoppable in their quest for recognition in the big world of rallying, they succeeded where others had failed and the BMC works teams were at the time probably the envy of the motorsport world. They introduced to the enthusiast the Special Tuning or ST as it was later known, a range of tuning products that the public could buy and fit to their own cars thus using the very same parts that the works team were using. Sadly the competition department was wound down and the ST finally went the same way in 1980. Imagine the excitement that hit the media when in the Autumn of 1993 Rover officially

announced that they would fund the build of several cars to once again campaign the world famous Rallye Monte Carlo. Although they were not works cars, the large contribution of materials and money to the project it was regarded as tantamount to funding a works team, especially when Paddy Hopkirk was named as one of the drivers. It was this that started 4 years of Works backed mini s to varying degrees, culminating in 1996 to a full works backed team of 2 cars and a full campaign of rallies and races for the three years. Typically the Mini of the 90 s, similarly to the Mini of the 60 s, carried with it a fair degree of controversy. Over the next four years there was plenty

of it, with money being diverted by the sponsor from one team to another, one car even being stolen and top rallying stars carrying out secret test sessions, being just a few examples. All of this using cars that were designed way back in the 50 s and even still using the same basic design of engine and gearbox against competitors who were using cars designed over thirty years later with modern engines and transmissions. This book highlights how the use of fuel injection, distributorless ignition, six speed gearboxes and modern tyres all helped to bring the mighty mini once again to the foreground of modern rallying and racing. In 1996 the ST range of competition

parts was re-introduced, with the parts coming from the latest 1996 build of works cars but once again in mid 1997 the project was pulled amid secrecy, sackings and bitter recriminations that even to this day have prevented the authors from being able to speak to those that were involved behind the scenes at the end of the line for the Last Works Minis . With many unseen photos of the cars development, copies of Rovers internal documents, copy pages from the road books of top rallies, all of this in colour this book truly brings this previously untold story to life.

Available again after a long absence! Always big on character and charm, Fiat's little cars played an important international roll in providing affordable and practical private transport for millions who had previously thought

their dream impossible. With particular emphasis on the now classic 600 and Nuova 500 cars, this book tells the full story of these 'baby' Fiats. Built, and exported to, many countries outside of the marque's native Italy, over 6.5 million Topolinos, 600s and Nuova 500s were sold, and an amazing number survive to this day. Also covered are the wonderful models built on these cars' tiny chassis by Italy's leading coachbuilders, and the motorsport success achieved by the Abarth versions of the little cars that everybody loves. *The Volkswagen Bus*

Book The Ultimate Mini Restoration Manual How to choose, restore, paint, trim, overhaul, update, upgrade, grossly overpower and generally have fun with a classic Mini This book covers British car electrical systems from 1950 to 1980. Particular emphasis is placed on the Lucas, Smith and SU components that were ubiquitous in British cars of the period. Each major system is given its own chapter, providing theory, component parts and full system operating explanations.

Modifications are suggested for those wishing to bring performance and reliability up to more modern standards. Fault-finding charts, cross referenced to the appropriate pages in the book, are provided throughout.

Ten years have passed since the original edition of this book was published, but Alfa Romeo enthusiasts everywhere are more active today than ever in preserving, modifying and racing these excellent cars. Throughout this time, the

author in true Alfista fashion, never stopped looking for and trying new techniques to increase the power, overall performance and reliability of Alfas and their engines. This book is the result of much research, and also first-hand experience gained through many Alfa rear wheel drive model projects, from the 105 series to the last of the 75 models. There is a lot of completely new information regarding TwinSpark Cylinder head mods, big-brake mods, LSD adjustment procedure, electrical system improvements, plus many flow-bench diagrams, dyno plots, and much more.
