This accessible book will help elementary school teachers improve literacy instruction inside or outside the Common Core environment. The authors address teachers' instructional needs by introducing key concepts from current trends in literacy education--from high-level standards to the use of 21st-century literacies. Readers then follow teachers as they successfully implement the curriculum they developed to promote high-level thinking and engagement with disciplinary content. The text focuses on three disciplinary literacy units of instruction: a science unit in a 2nd-grade classroom, a social studies (history) unit in a 4th-grade classroom, and a mathematics unit in a 6th-grade classroom. Each unit revolves around a central inquiry question and includes research-based strategies for using reading, writing, and classroom talk as tools to foster disciplinary understandings. This unique, insider's look at how real teachers build and implement a Common Core-aligned curriculum will be an invaluable resource for teachers, schools, and districts as they move forward to align their own curricula.

 Good behaviour is the beginning of great learning. All children deserve classrooms that are calm, safe spaces where everyone is treated with dignity. Creating that space is one of the most important things a teacher needs to be able to do. But all too often teachers begin their careers with the bare minimum of training – or worse, none. How students behave, socially and academically, dictates whether or not they will succeed or struggle in school. Every child comes to the classroom with different skills, habits, values and expectations of what to do. There's no point just telling a child to behave; behaviour must be taught. Behaviour is a curriculum. This simple truth is the beginning of creating a classroom culture where everyone flourishes, pupils and staff. *Running the Room* is the teacher's guide to behaviour. Practical, evidence informed, and based on the expertise of great teachers from around the world, it addresses the things teachers really need to know to build the classrooms children need. Bursting with strategies, tips and solid advice, it brings together the best of what we know and saves teachers, new or old, from reinventing the wheels of the classroom. It's the book teachers have been waiting for. *Classroom Habitudes* Routledge

Now in its 3rd edition, *Better Learning Through Structured Teaching* is the definitive guide to the gradual release of responsibility—an instructional framework any teacher can use to help students to be more successful and self-directed learners. To gradually release responsibility is to equip students with what they need to master content and develop new competencies. On a day-to-day basis, it means delivering lessons intentionally structured to incorporate four interrelated phases: * Focused Instruction ("I do it") that sets students up for cognitive apprenticeship by establishing lesson purpose, modeling strategies and skills, and sharing information and insight. * Guided Instruction ("We do it together") that incorporates targeted prompts, cues, and questions to scaffold understanding. * Collaborative Learning ("You do it together") that allows students to consolidate and extend understanding through accountable group tasks built on discussion and cooperative problem solving. * Independent Learning ("You do it alone") that provides students opportunities to practice and apply the skills and knowledge they've acquired to create authentic products and ask new questions. Authors Douglas Fisher and Nancy Frey detail the components of each phase, sharing proven strategies and real-life examples. You'll find a variety of useful tips for classroom implementation, along with new guidance on teacher credibility,

social-emotional learning, and embedding assessment throughout all four phases. No matter what grade level or subject you teach, *Better Learning Through Structured Teaching* is an essential resource for improving your practice and empowering your students.

The Teacher's Guide to Restorative Classroom Discipline Solution Tree Press

This is a textbook for teachers that demonstrates how philosophical thinking can be used in teaching children. It begins with the assumption that what is taught in schools is not (and should not be) subject matter but rather ways of thinking. The main point is that the classroom should be converted into a community of inquiry, and that one can begin doing that with children. Based on the curriculum that Matt Lipman has developed at the Institute for the Advancement of Philosophy for Children, which he heads, this book describes the curriculum and explains its use. The text is self-contained, however. This revision is thorough-going and incorporates new chapters, as well as new material in old chapters. Part One focuses on the need of educational change and the importance of philosophical inquiry in developing new approaches. Part Two discusses curriculum and teaching methodology, including teacher behavior conducive to helping children. Part Three deals with developing logic skills and moral judgment. It concludes with a chapter on the sorts of philosophical themes pertinent to ethical inquiry for children: the right and the fair, perfect and right, free will and determinism, change and growth, truth, caring, standards and rules, thinking and thinking for oneself. Education, in this sense, is not a matter of dispensing information; it is the process of assisting in the growth of the whole individual.

First hand stories by teachers for teachers on one of the most difficult topics to teach: diversity According to recent surveys, almost half of all students belong to a minority group, and that number is increasing yearly. Coping with the challenges associated with diversity and dealing with others in a sensitive and appropriate manner can be one of the more difficult aspects of teaching. Although much has changed in the landscape of diversity, there is still a long way to go both in and out of the classroom. Educating students on how to be culturally aware is invariably a challenge and a sensitive process in its own right. *One Size Does Not Fit All* addresses many of the challenges of diversity education by offering sage advice from teachers. With a wonderful

mixture of voices and points of view, from big cities to small towns, these stories of how teachers have dealt with this very sensitive topic will provide a reassuring guide to fellow educators. Stories range from those about students with strong cultural identities, to stories of how teachers handle issues of sexual orientation, religion, and world conflicts.
