*Teaching Children to Care* Routledge

This book is a distinctive collection of narratives of female Solution Focused practitioners, from across six continents, sharing their unique ways of using the approach at personal, professional, and social levels. Nineteen female practitioners from around the world share their practice and experience, and reflect on how their gender has influenced their work within different cultural, sociological, and socio-economic contexts. The editors introduce the concepts of a Solution Focused DNA and then encourage the contributors as well as the readers to answer questions such as: What are the common characteristics that are a part of your Solution Focused DNA? Which of them are related to gender, which of them to the Solution Focused Approach, and which of them to your sociocultural context? Contributors also provide insights on how they work from the Solution Focused approach integrating their own creative styles using embodiment and dance, animal assisted therapy, and humour. The chapters in this book explore a wide variety of themes and contexts, including shelters, trauma, the LGBTQ community, prisons, schools, refugee camps, veterans, the medical field, research, children, and more. This book will inspire practitioners regardless of gender to reflect on their own practice and to use and apply the Solution Focused Approach in innovative and

creative ways.

**Solution-Focused Therapy** Wadsworth Publishing Company  
A common question at the initial meeting of a family therapist and a new client(s) is often whether or not to include a child or children in the counseling sessions. The inclusion of a child in the family therapy process often changes the dynamic between client and therapist -- and between the clients themselves -- within the context of the counseling sessions. And yet, although this is such a common experience, many counselors and family therapists are not adequately equipped to advise parents on whether to include a child in therapy sessions. Once the child does make an appearance in the counseling session, the therapist is faced with the challenges inherent in caring for a child, in addition to many concerns due to the unique circumstance of the structured therapy. Counseling a child in the context of a family therapy session is a specific skill that has not received the attention that it deserves. This book is intended as a guide for both novice and experienced counselors and family therapists, covering a wide range of topics and offering a large body of information on how to effectively counsel children and their families. It includes recent research on a number of topics including working with children in a family context, the exclusion of children from counseling, and counselor training methods and approaches, the effectiveness of filial play therapy, the effects of divorce on children, and ADHD. Theoretical discussion is given to different family therapy approaches including family play therapy and filial play therapy. Central to the text are interviews with leaders in the field, including Salvador Minuchin, Eliana Gil, Rise VanFleet and Lee Shilts. A chapter devoted to ethical and legal issues in working with children in family counseling provides a much-needed overview of this often overlooked topic. Chapters include discussion of specific skills relevant to child counseling in the family context, case vignettes and examples, practical tips for the counselor, and

handouts for parents.

**Social Workers' Desk Reference** Oxford University Press  
**Working on What Works (WOWW)** is a solution-oriented classroom management programme which targets both teachers and students, aiming to improve behaviour and relationships within the classroom (Berg and Shilts, 2004; 2005). The intervention is delivered over 10 weeks with the support of a WOWW coach. It centres on complimenting, goal setting and scaling. The purpose of the current study was to investigate the impacts of WOWW when it is adapted from a whole-class intervention to a small-group intervention. The small group in the present study were five children in Year 2 with internalising and/or externalising behaviour difficulties, as identified by their class teacher. The research employed a case study design to explore the effects of the adapted WOWW intervention on the children's behaviours and to investigate participants' perceptions of WOWW. The study used both quantitative and qualitative measures, including classroom observations, semi-structured interviews, focus groups, questionnaires and ranking and rating activities. Previous research on WOWW is limited, but indicates positive effects on teacher confidence and teacher perceptions of student behaviour. The findings of the current study suggest positive trends following the adapted WOWW intervention; the children's on-task behaviour increased while the teacher's ratings of their inattention, aggression/disruption and anxiety all decreased. Perceptions of the intervention were positive and the teacher commented on the significant impact WOWW had on the group of children. The findings support previous WOWW studies and suggest its possible utility as a classroom intervention.

Wer in Therapie oder Beratung mit Kindern und Jugendlichen lösungsfokussiert arbeitet, hat die Aussicht, vergleichsweise schnell zu guten und dauerhaften Ergebnissen zu kommen. Zu den Voraussetzungen gehören handwerkliches Können, Geschick und Fantasie, besonders wenn es um schwierige Fälle oder unvorhergesehene Situationen geht. Therese Steiner, langjährige Weggefährtin von Insoo Kim Berg und Steve de Shazer, den Pionieren der Lösungsfokussierung, stellt in diesem Buch die besondere Art der Kommunikation dieser Methode in den Mittelpunkt. Neben den Grundannahmen des "Milwaukee-Ansatzes" vermittelt sie anschaulich, wie man ein therapeutisches bzw. pädagogisches Gespräch lösungsorientiert aufbaut, den Therapieprozess gestaltet und zum Erfolg führt. Im Kernkapitel des Buches stellt die Autorin die "Frequently Asked Questions" aus ihrer Praxis zusammen: Wie hält man einen Therapieprozess am Laufen? Wie geht man mit Eltern um, die versuchen, die Therapeut:in oder Berater:in auf ihre Seite zu ziehen? Was tun, wenn ein:e Jugendliche Regeln missachtet oder aus der Therapie aussteigen möchte? Aus den Antworten auf diese Fragen entsteht ein alltagstauglicher Führer durch die lösungsfokussierte Arbeit, der in seiner Vielfalt und Praxisnähe nichts zu wünschen übrig lässt.
