Other than the A&P chapter, I personally did not like the cellular respiration, photosynthesis, and

plant chapter. Likewise, there was little to no taxonomy covered in the fourth edition (which appeared in at least 3 of my questions on my actual DAT). If you want a different perspective, try Barron's AP biology, which compliments Cliff's very well.

Hi, I've already gone through more than half of the Cliff's AP Bio 4th edition. So far I've covered the following topics: chemistry, cells, cellular respiration, photosynthesis, cell communication, cell division, heredity, molecular bio, and evolution. But I just

read that the 3rd edition is a more appropriate study material for the DAT.
