Anesthesia Outside of the Operating Room is a comprehensive, up-to-date textbook that covers all aspects of anesthesia care in OOR settings, from financial considerations to anesthetic techniques to quality assurance. With increasing numbers of procedures such as cardiac catheterization and imaging taking place outside of the main OR, anesthesia providers as well as non-anesthesia members of the patient care team will find this book critical to their understanding of the principles of anesthesia care in unique settings which may have limited physical resources. The book includes chapters on patient monitoring techniques, pre-procedure evaluation and post-procedure care, and procedural sedation performed by non-anesthesia providers. Its authors address problems of anesthesia that have unique answers in OOR settings, such as patient transport and cardiac arrest, and discuss technological progress and considerations for the future. The text also covers surgical procedures and anesthetic considerations by procedure location, such as radiology, infertility clinics, field and military environments, and pediatric settings, among many others. Select guidelines from the American Society of Anesthesiologists (ASA) are provided as well. Edited by the senior faculty from Harvard Medical School and with contributions from other academic institutions, *Anesthesia Outside of the Operating Room* provides a unique and convenient compendium of expertise and experience.

The Oxford Handbook of Anaesthesia has been completely updated for the second edition. All chapters

have been rewritten and a number of new expert authors have been brought on board. Additional new material

includes anaesthesia for the critically ill, and a comprehensive section on anaesthetic risk including

anaesthetic risk tables. The first section deals with preoperative issues affecting the administration of

anaesthesia. Practical advice is provided covering the impact of medical disease on anaesthesia. The second

section describes practical anaesthetic techniques for surgical specialties, including most subspecialties such as

thoracic and neuroanaesthesia. Separate, comprehensive sections on paediatric and obstetric anaesthesia are

included. The management of emergencies arising during anaesthesia are fully covered with helpful action plans and

algorithms throughout. Uncommon conditions and their management are included, and there is an extensive drug

formulary and guide to infusion drugs. As with the first edition, this new edition will be the essential handbook for

anaesthetists, both junior and experienced, for registrars and those sitting exams, as well as ODPs and nurses

involved in theatre area work and pre-assessment. It is the one book for anyone working in anaesthesia to keep to

hand at all times!

People facing a new diagnosis of cancer are unsettled by their prognosis and treatment options, and they often seek to integrate complementary modalities into their conventional care plan, hoping to improve their chances of cure and decrease side effects. Many do so without informing their oncologist, for fear of alienating them or not convinced that their physician would be informed about complementary therapies. Integrative Oncology, the first volume in the Weil Integrative Medicine Library, provides a wealth of information for both practitioners and consumers on the emerging field of integrative oncology. Noted oncologist Donald Abrams and integrative medicine pioneer Andrew Weil and their international panel of experts present up-to-date and extensively referenced chapters on a wide spectrum of issues and challenges, bound in one comprehensive, reader-friendly text in a format featuring key points, sidebars, tables, and a two-color design for ease of use. It is destined to emerge as the definitive resource in this emerging field.
