A Textbook of Clinical Ophthalmology Butterworth-Heinemann Medical

With the current rapid development of ophthalmic sciences, it is difficult for ophthalmologists to remain fully up to date with all areas of clinical specialty. The second edition of this atlas describes the latest advances in clinical ophthalmology. Each chapter deals with a separate part of the eye, discussing different diseases and disorders that may be encountered by ophthalmologists. Each condition is accompanied by concise descriptions of major and minor signs, as well as detailed photographs illustrating the disease. This comprehensive new edition features 3750 full colour images and illustrations, including more than 600 additional photographs. Images from the first edition have been replaced with better quality photographs taken with the Haag-Streit BX-900 Photo-Slit Lamp and the Zeiss FF 450 Plus Fundus camera. Key points

Clinical Ophthalmology JAYPEE BROTHERS

PUBLISHERS

Clinical Ophthalmology: Medical and Surgical Approach is being launched as the second edition of Clinical Practice in

Ophthalmology. In this challenging intellectual environment " Clinical Ophthalmology: Medical and Surgical Approach " brings together a distinguished group of seventy-one experts and provides a comprehensive text combined with integrated visual reference, in the form of black and white and colored figures. The value of this book lays in the quality and expertise of the text chapter contributors. This text attempts to update the state-of-the-art ophthalmology in a lucid, authoritative and well-illustrated manner. Ten sections encompassing forty-four chapters provide a new insight into the subject. Twenty-one chapters cover new concepts and technological advances in the diagnosis and management of common ophthalmic disorders. Several chapters deal with advances in lens surgery, and several authorities cover new concepts in retinal disease including macular and submacular surgery. Modern concepts in corneal disease, glaucoma, oculoplastics, ocular oncology, infectious and inflammatory diseases, strabismus, trauma, and optic nerve disorders are each presented by experts in ophthalmology. As ophthalmology has become more complex, we are driven to establish higher standards of scientific proof for our treatments and simultaneously to run our practices with greater efficiency to be able to bring the best of high technology to bear on our patients ' problems while being mindful of cost. Ophthalmology is a continuously advancing field. As new technologies are being introduced at a rapid pace, the ophthalmologist must learn their intricacies as one begins to apply them to the treatment of ocular diseases. The adoption of new technology, in turn, brings with it the need to learn new skills and develop new treatment algorithms. Old concepts change and new ideas are plentiful. Everything is difficult before it becomes easy. This book is intended for the experienced ophthalmologists, postgraduates as well as those in training. It is hoped that this book will be sufficiently comprehensive to aid the ophthalmologist in making diagnosis of common ophthalmic conditions as well as in performing competent surgeries. This pragmatic book provides an understanding of ophthalmology, important to the everyday practice. This book will find a meaningful and valued place in the libraries of ophthalmologists, today and in future.

Atlas of Clinical Ophthalmology Elsevier Health Sciences
