specializing in hip & knee  
orthopedics.

Patient Registries -  
Registries for  
Evaluating Patient ...  
The challenge of  
managing mid-foot pain  
| RACGP. Anatomically,  
the mid-foot is the  
region distal to the

talus and calcaneus,  
and proximal to  
metatarsal bases  
(Figure 1). 1 However,  
from a differential  
diagnosis assessment  
perspective, it is  
necessary to consider  
conditions of  
significance occurring  
at the margins of the  
more strictly applied  
anatomical boundaries.

Institute ...

The purpose of this  
document is to serve as a  
guide for the design and  
use of patient registries for  
scientific, clinical, and  
health policy purposes.  
Properly designed and  
executed, patient registries  
can provide a real-world  
view of clinical practice,  
patient outcomes, safety,  
and comparative  
effectiveness. This user's  
guide primarily focuses on  
practical design and  
operational issues ...
