About 550 registrants from 51 different countries attended the Seventh Ottawa Conference on Medical Education and Assessment in Maastricht. We received 525 abstracts for the conference, divided in thematic poster sessions and platform presentations. Organising the conference was an honour and we tried to meet the high standards of a friendly and relaxed atmosphere which has characterized previous Ottawa conferences. During and after the conference about 250 papers were submitted for publication in the conference proceedings, leaving us little time for a post-conference depression. Despite the large number of papers, the editors have attempted to review and edit the papers as care fully as possible. Occasionally, however, correspondence exceeded reasonable deadlines, preventing careful editing of a small number of the papers. Although we felt that our editorial task was not quite finished, we nevertheless decided to include these papers. We thank the many authors for their enthusiastic and prompt response to - occasionally tedious - editorial suggestions and requests. We are sure that this collective effort has resulted in a book that will make an important contribution to the field of medical education. The editors want to thank Jocelyn Flipppo-Berger whose expertise with desk top publishing and perseverance was a great help.

JustCoding's Clinical Scenario Workbook: 2021 ICD-10-PCS Edition provides an opportunity for coders to practice and refine their skills in a hands-on way by using a wide range of real-life case scenarios. Coders will determine the correct fiscal year 2021 ICD-10-CM and ICD-10-PCS codes to report for each case scenario based on provided documentation, evidence of sufficient medical necessity, and any conditions present that would allow for MS-DRG capture. A full answer key with coding rationale for each case allows coders to self-audit and find immediate answers to their questions. When applicable, cases will also include references to guidance from the 2021 Official Guidelines for Coding and Reporting, Coding Clinic, and the ICD-10-CM and ICD-10-PCS manuals. These case scenarios let coders practice real-world coding without risking actual revenue. Coders can practice on their own or as a group, with enough cases for coding teams to complete one each week together for a full year. Coders will also have access to additional downloadable cases. This book will help coders by:

- Simulating real-world coding, letting coders actively report ICD-10-CM and ICD-10-PCS codes for each case scenario
- Providing answers for every case with rationales from experts who explain why certain codes should or should not be reported
- Giving a refresher on standards and coding guidelines necessary for

compliance

Real-world scenarios help you develop clinical reasoning skills for primary care! Case Studies in Primary Care: A Day in the Office, 2nd Edition includes 50 case studies on the most commonly encountered situations in primary care. Demonstrating the kinds of health problems that a Nurse Practitioner or Physician Assistant might see during a typical clinical day, case studies cover patients from various cultures and all ages. You ' re asked to analyze data and think critically in reaching accurate diagnoses and planning effective treatment; you can then submit your responses online for grading and instant feedback. Real-world scenarios offer the opportunity to analyze clinical situations likely to be encountered in today's primary care settings, providing practice in clinical reasoning skills. Day in the Office format presents cases hour by hour, in the way a typical clinical day might unfold. Emphasis on problem-based learning helps you to think critically and analyze clinical situations — such as ear infections, diarrhea, and coughing and fever — in order to provide appropriate primary care. Six NEW cases are included (for a total of 50), with three focusing on older clients with more complex health challenges, one addressing unplanned pregnancy, and two addressing practice management issues. NEW! Emphasis on follow-up care addresses patients coming to the primary care setting from retail clinics, rehabilitation settings, or acute-care settings, and underscores the importance of interprofessional collaboration. NEW! Enhanced patient diversity includes cases for all age groups, and reflects a more contemporary appreciation of cultural diversity and gender/gender identity. NEW! Updates to all cases ensure that case studies and feedback are consistent with the latest research evidence, clinical practice guidelines, and national and international treatment standards. NEW! Online answer submission allows you to write Assessment and Plan answers in the printed book, then submit answers online for grading and feedback. NEW! Grading rubrics are provided on the companion Evolve website to help you develop your answers. NEW! Introduction explains how to get the most out of the book.
