"This book is a user-friendly, real-world guide to assessing and managing any type of wound. The author presents vital information for nurses and nursing students who provide wound care in any setting...a wonderful resource for nurses."--The AORN Journal (Association of Perioperative Registered Nurses) "Wound care is arguably the single most difficult topic in medicine. It has no defined solution like insulin for the diabetic...no easy strategy that covers all wounds...we are so tremendously blessed when [a wound care specialist] like Zelia carves out time to capture a career of experiences in text so that it can be shared with others. We are indebted to her for making this important contribution to the clinician's armament for dealing with [the] difficult-to-heal wounds of their patients." Bruce Gibbins, PhD Founder, Chief Technical Officer and Chairman of the Board of AcryMed, Inc. Former faculty at the University of Otago Medical School Using the concise, compact Fast Facts format, this guide encompasses the multitude of new healing technologies and presents important breakthroughs in understanding why some wounds don't heal. Each chapter builds, step-by-step, on the essential principles of wound care including wound assessment and documentation, the spectrum of wounds from simple to complex, wound treatment guidelines and protocols, and the legal aspects and regulations surrounding wound care. This user-friendly guide organizes the vast amount of information relating to wound care products and eases the complexity of wound management. A "Fast Facts in a Nutshell" section in each chapter provides quick access to important wound care principles, and bullet-point information and tables enable readers to quickly locate relevant information. Reconstructive Plastic Surgical Nursing Lippincott Williams & Wilkins

Increasingly, wound management is recognised as a specialised area of practice. Advances in wound-care products, surgical interventions, and social-support options create an often bewildering array of knowledge for healthcare practitioners. This textbook opens with a focus on the core elements of effective wound management: an understanding of how wounds heal and what inhibits wound healing, rigorous assessment, use of outcome measures, evidence-based approaches to practice, and an understanding of how clinical research is done. Key aspects of wound-bed preparation and management - diagnostic investigations, assessment and management of non-viable tissue, infected wounds, dressings and technology, pharmacological therapy, and acute wounds – are then elucidated. Optimal management of commonly-encountered wounds (venous leg ulceration, arterial and mixed arterial-venous ulceration, inflammatory ulcers, pressure injury, and the high-risk foot) and unusual wounds is described. The path to professionalisation of wound management in Australia is charted. The book ends with a list of wound care products (types, properties, uses, distributor-contact details). The editors of and specialist contributors to this text have aimed to build on the foundations provided by the numerous basic, introductory-level textbooks in the field to provide an authoritative, comprehensive, and up-to-date textbook for wound managers who wish to further develop their knowledge and skills.
